Morning Scene on Fancher Creek

Fancher Creek Nurseries

Fresno, California

1930
FOUNDED IN 1884—The Fancher Creek Nurseries under the direction of the late Geo. C. Roeding, who was one of California's outstanding figures in horticulture, have proven an invaluable aid to thousands of planters and growers throughout the country annually. Starting on a small scale this company has improved and enlarged its plant until, at the present time, it stands among the foremost in the West. Fruit Trees, Vines, and Ornamental stock which have been given the best of care from the time of planting to date of shipment; stock that is true to name; courteous and conscientious treatment in all our dealings with our customers have helped to build up and make this nursery what it is to-day.

Hundreds of prosperous orchards and vineyards in all parts of the world give testimony to the quality of nursery fruit trees and vines grown in the extensive propagating grounds of the Fancher Creek Nurseries. Only on a basis of merit and service is your business solicited and accepted. The orders of intending planters are solicited with a feeling of confidence that we can meet their requirements with reliable trees and a service that satisfies and makes old patrons out of new ones.

USE THE ORDER SHEET AND SELF ADDRESSED ENVELOPE enclosed with this catalogue. Send us your order today. Trees or vines planted this season will soon return their initial cost.

---

Read Carefully Before Placing Your Order

PLEASE USE THE ORDER SHEET—It saves your time and ours and will facilitate the filling of your order.

PRICES—Prices quoted in this catalog are for stock at Fresno. Freight or express charges are to be paid by purchaser.

TERMS—Cash. Orders to be shipped C.O.D. must be accompanied by one-quarter the amount of the order. Send post-office money order, registered letter, express order, draft or check. All orders from foreign countries must be accompanied by draft or international money-order payable in U. S. Gold coin.

EXPORT ORDERS—Freight charges must be prepaid on all orders to foreign countries. Full amount of the order in cash and in addition thereto should be added at least one-half of the amount for transportation charges. Any amount remitted and not used will be returned to the purchaser.

SUBSTITUTION—Please state on the order sheet whether substitution will be permitted, as we feel at liberty when no instructions accompany the order to substitute with varieties as nearly similar as possible. We never substitute on commercial orders without first obtaining consent of purchaser.

PACKING—No Charge will be made for packing.

INSPECTION—We guarantee all stock to pass inspection.

ERRORS—Mistakes made in filling orders will be cheerfully rectified, but we must respectfully request prompt notice of any error found.

QUANTITY ORDERS—Articles mentioned in this catalog will be furnished as follows:—5 of a variety at the 10 rate, 50 at the 100 rate, 300 at the 1000 rate. Purchasers will please bear in mind that the quantity rates will apply only where multiples of the same variety of trees are ordered and not on assortments.

GUARANTEE—The Fancher Creek Nurseries will exercise care to have all stock true to name; nevertheless it is understood and agreed that should any stock prove untrue to name, the Fancher Creek Nurseries shall be liable for the sum paid for the stock which may prove untrue, and shall not be liable in any greater amount.

We accept all orders on condition that same shall be void should injury befall our stock from fire, frost, floods, drought or any other cause which could not be prevented and over which we have no control.

BEFORE SEALING THIS ENVELOPE

Be sure you have written your name, postoffice and point to which you wish this order shipped plainly on your order. Be sure you have given size of trees wanted.
MISCELLANEOUS SUPPLIES

KNIVES—SHEARS

We have selected the following European manufacture of Knives and Shears, having tested them and found them made of the very best quality of steel and entirely suitable for the work for which they were intended. We do not hesitate in recommending them to our customers.

Henckels Stationary Handle Budder. Maple wood; fine quality steel. 75c each.

Henckels Stationary Handle Pruning Knife No. 3651. Beechwood handle with three inch blade, glazed finish. A fine quality knife. Price $1.25 each.

Henckels Stationery Handle Grafting Knife. Maplewood handle, patterned after most approved style; fine quality steel; heavy size. $1.00 each.

Henckels "Professional" Pruning Shears No. 220. Blade of toughest steel ground to a thin edge. Extra heavy frame gives stability to shear while in operation. Brass springs of special temper, durable and pliable. One extra blade supplied with each shear. Price $6.00 each postage prepaid.

T. & O. TREE SUPPORT

Here's a time and money saver. An economical device for wiring trees that will not grow into the limbs or come unfastened when properly installed. The T. & O. Tree Support makes a good permanent job on heavily laden fruit trees by using the circle wire system as shown in the picture at the right. Many are using this system on YOUNG trees, because it is quickly installed and easy to change. In wiring a tree with the circle system, snap the tree supports on the main limbs and thread the circle wire through the loops made for this purpose and so on around the tree. Now cut the wire and bring the two ends together. The lower, outstanding limbs below the circle wire, usually called pick-ups, may be supported by placing a T. & O. tree support on said limbs and running a lighter wire up to the circle wire. If you anticipate raising the circle wire as the tree grows, cut your wire about three feet longer than necessary to bring the ends together and this will give you the extra wire required when you wish to raise the supports.

Supports are furnished in three sizes and are constructed of high grade galvanized iron.

HORTICULTURAL BOOKS

Roeding's Fruit Grower's Guide. Third edition. The illustrations in this book in many cases, convey the information desired. There are few men in California who have given more thought and who have had a wider experience in diversified horticulture than Geo. C. Roeding. This book contains practical information presented in a clear, concise manner which will be appreciated by the novice as well as the experienced fruit grower. Price $1.25 per copy, prepaid.

Yucca Tree Protectors

Made From the Yucca Palm

A perfect protection against rabbits, grasshoppers, borers, heat of the sun, etc.

No tree should be planted without protection. Our extremely long, hot dry summers makes it imperative for all fruit growers to shade the bodies of young trees. The Yucca protectors are open grained allowing free circulation of air.

The method of tying is guaranteed not to girdle or injure your trees. These protectors are not affected by rain. Soak the bundles in water before using.

LAWN SEED

For best results we recommend mixing the Blue Grass and Clover half and half. One pound of either Blue Grass or Clover will cover 300 square feet.

Kentucky Blue Grass. Best Grade 50c per pound, or $4.50 per ten lbs.

White Lawn Clover. 50c per lb. or $4.50 per ten lbs.

YUCCA PROTECTORS MAKE THRIFTY TREES
FRUIT TREE DEPARTMENT

Whether you own a large ranch or only a small city lot, and regardless of whether you wish to plant one tree or several thousand you will find listed in this catalogue worthwhile commercial and home orchard varieties of fruit trees, grapevines and berry plants.

Home grown fruit is a distinct asset in this day of high-priced food. The home orchard will provide the family with well ripened, lucious fruits of your choice. Don’t put off ordering. Its your duty to your family. Trees or vines planted this season will soon return their initial cost.

RIPENING DATES:—The season for ripening as given with the descriptions are at the best only approximate, and apply more especially to the San Joaquin Valley. In the coastal regions and higher mountain valleys the season will be a little later.

GRADING OF TREES:—We grade all of our fruit trees by caliper rather than by height. This method of grading gives our customers a more uniform grade of tree than by the old method of grading by height. Trees graded by caliper, when planted in orchard form and properly cut back, will be of uniform size and much more satisfactory to the planter than trees graded by height. We grade our trees on the following basis:

6 to 8 grade trees to caliper not less than $\frac{1}{4}$ inch.
4 to 6 grade trees to caliper not less than $\frac{3}{8}$ inch.
3 to 4 grade trees to caliper not less than $\frac{3}{16}$ inch.
2 and 3 grade trees to caliper not less than $\frac{1}{4}$ inch.

THE INEXPERIENCED PLANTER should bear in mind that deciduous fruit trees MUST BE CUT BACK WHEN PLANTED if results are to be obtained.

Varieties, Descriptions and Prices

THE APPLE

Apples do exceedingly well in all the coast counties as well as in the foothills and mountains of the Sierra Nevada, but broadly speaking, the hot interior valleys are not suitable to commercial apple culture hence in these sections farmers should limit planting to a few trees and sorts for family or local use.

Our list includes all the desirable varieties for home and commercial planting on the Pacific Coast.

Arkansas Black. Season, November-December; quality shipping and market. Fruit roundish and uniform; skin red maroon; flesh deep cream in color, fine firm, crisp and of good flavor; a good keeper. Tree large and vigorous, upright spreading, limbs large, stout and open. Fine for planting in the interior valleys for family use.

Delicious. No apple of late introduction has been more extensively planted. Fruit large and tapering, visibly ribbed; skin yellow overspread with deep red; flesh white, fine grained, sweetly acid with a pleasant aroma. Tree large, uniform, spreading, hardy, productive with smooth and stout branches. Does well in the mountain and foothill regions of the state. Season, September.

Gravenstein. A most popular market, shipping and culinary fruit. It is of uniform size but irregular shape; skin a bright yellow, striped with light and dark red shading; flesh yellow, of good texture, crisp, juicy and tender. Tree a robust grower. Being one of the earliest commercial varieties the fruit commands a good price on the market. Season, August.

Jonathan. Ripens in October; a favorite market, shipping and culinary variety. Fruit medium size, roundish and oval; skin bright red, on the sunny side quite dark and in some specimens almost black; flesh delicate cream with a faint suggestion of red; flavor excellent. It does well in practically all sections.

Red Austrachan. A July apple, fine for home use and local market. Fruit medium size; skin red, tender, a mild green in color, overspread with deep crimson stripes; flesh white with a faint greenish tinge, tender, subacid, juicy and of good flavor. Tree a good producer and adapted to all sections of California. No home orchard is complete without this variety.

Red June. A beautiful red dessert apple of uniform size and shape. Fruit medium size; skin deep red suffused with yellow; flesh white, tender, with a pleasant subacid flavor. Tree a fairly reliable bearer, with short, stout, curved branches. Does well in our interior valleys. Season, July.

Rome Beauty. Season, November; quality shipping and market. Fruit medium in size and somewhat oblong in shape; skin rather tough

GROW YOUR OWN "APPLE PIES." PLANT AN APPLE TREE.
but smooth, splashed and mottled with brilliant red over a base of yellow; flesh white, tinged with green, fine grained, juicy, with a subacid flavor. Tree dwarf, dense and a prolific bearer.

Stayman Winesap. Does well in the interior valleys and foothills, although there are also successful orchards in the coastal region. Fruit large and round; skin dull carmine, smooth and thick; flesh greenish yellow, firm and quite acid in flavor. Tree vigorous, spreading and open. Season, December.

White Astrauchan. Fruit large, almost round, slightly flattened at either end; skin deep yellow suffused with pink and red; flesh white and decidedly acid, making it desirable for cooking. Tree hardy, compact, robust and productive. One of the best of the early varieties. Season, July.

White Winter Pearmain. A splendid shipping and market variety. Fruit medium to large in size and oblong in shape; skin pale yellow with a brilliant blush on sunny side, surface covered with russet dots; flesh yellow, fine grained, tender and juicy. Tree vigorous, producing regularly abundant crops. Will grow on most any kind of soil; fruit a good keeper. Season, November.

Winter Banana. A large, shaped, yellow apple with a distinct musky fragrance. Fruit large, almost round, somewhat conical, flattened at base; skin thick, tough, yellow in color with a dark pink cheek on sunny side; flesh crisp and tender, subacid in flavor and of good quality. Does fine in our coastal regions. Season October.

Yellow Bellflower. California’s staple market and shipping variety. Fruit large, oblong and ribbed, which is intensified toward the blossom end; skin yellow suffused with a tinge of green, pink blush on sunny side; flesh nearly white, firm, tender and juicy. Season, October.

Yellow Newtown Pippin. A prime favorite for home orchard and commercial plantings. Fruit irregular, oblate and somewhat angular; skin rather tough, overwrapped with russet dots, yellow in color shading to pink; flesh cream white, firm, tender and slightly acid. Season, December.

THE CRAB APPLE

Red Siberian. Fine for cooking and preserving. Fruit rather small, round, and somewhat flattened at the base; skin a bright red on a yellow field; flesh subacid, fine for cider making, jelly and spiced sweet pickles. Tree hardy, vigorous, long lived and a good bearer. Grown successfully in all parts of California. Season, August.

Transcendent. Season, September; quality home use. Fruit quite large and flattened at the end; skin golden yellow with rich red cheek; flesh crisp, tender and subacid. Tree large, spreading, drooping, curved and overhanging branches. The best large crabapple.

Whitney. A handsome dessert fruit, also a good local market seller. Fruit extra large, uniform in shape, round-conic or oblate; skin a bright red with gray russet, flesh cream colored, fine grained, juicy and of excellent flavor. Tree somewhat spreading, medium size, with long, stout, curved branches. Season, August.

THE PEAR

Our Pear trees are all budded on French root with the exception of the Bartlett which we can supply on either French or Calleryana root. State root desired when ordering this variety.

WHITE WINTER PEARMAIN

PEARS ARE DELICIOUS FRUITS.—GROW YOUR OWN.
BLACK TARTARIAN CHERRIES

THE QUINCE

Though a fruit long and widely cultivated in many regions, the quince has never attained commercial rank in the fruit trade of America. This is somewhat anomalous, as its fine qualities for jelly, preserves and sauces are superior to those of any other fruit. Such varieties as Pineapple and Smyrna are ideal for culinary purposes. Of late there has been a wider interest manifested in quince culture in California, resulting in carload shipments to eastern markets. It thrives best in a deep loamy, moist soil and is particularly adapted to planting on low damp land where other kinds of fruit will not thrive.

Pineapple. A comparatively new variety of California origin. Fruit apple-shaped and nearly round; skin smooth and light golden yellow in color; flesh white, tender, with a flavor suggestive of pineapple. Tree thrifty, medium size and free fruiting. Season, September.

Smyrna. Introduced by us from Smyrna in 1886. Fine for shipping and local market. Fruit large, round-oblong, surface lightly furrowed; skin a beautiful shade of lemon yellow; flesh tender, aromatic, mildly sub-acid. Tree a strong vigorous grower with large foliage. A consistent bearer. Fruit has a very strong quince perfume. Season, September.

THE CHERRY

Cheerry producing sections of California are limited mainly to the counties near San Francisco Bay. In the counties north of the bay where the benefit of the mild sea air is felt cherry growing should be encouraged. In the upper San Joaquin Valley and in sections of the Sacramento Valley and the adjacent foothill regions there are many good cherry orchards. The ever increasing demand for this popular fruit should be an incentive to plant more orchards. In the hot dry interior sections cherries should be planted only for home use.

The sweets and sours. The Hearts, or Bigorreuses, are the sweet cherries, the trees being strong and vigorous growers. These are designated by the letter 'H'; the Dukes, or Mo-

Pineapple. A comparatively new variety of California origin. Fruit apple-shaped and nearly round; skin smooth and light golden yellow in color; flesh orange yellow, fine grained, and when preserved or made into sauce, of a rich acidulous, aromatic flavor. Tree robust, hardy and productive. A favorite in the interior valleys and also in the coastal counties. Season, early June.

Apple, syn. Orange. Ripens in September; fine for shipping, market and home use. Fruit large, roundish, with small necks; skin smooth and light golden yellow in color; flesh white, tender, with a flavor suggestive of pineapple. Tree thrifty, medium size and free fruiting. Season, September.

Smyrna. Introduced by us from Smyrna in 1886. Fine for shipping and local market. Fruit large, round-oblong, surface lightly furrowed; skin a beautiful shade of lemon yellow; flesh tender, aromatic, mildly sub-acid. Tree a strong vigorous grower with large foliage. A consistent bearer. Fruit has a very strong quince perfume. Season, September.

THE PLUM

The plum in its geographical distribution on the West Coast of the United States, particularly in California, covers a wide range of soils and climates, being thrifty both along the Coast Regions and in the interior valleys, and well up into the foothills.

There are two distinct lines in the classification of plums; those which are especially shipping sorts and other types which are primarily used for canning. The very fact that plums may be picked considerably riper than many other fruits makes them very valuable for long distance shipments, due to their fine shipping qualities. Plums need not be peeled when canned, a great point in their favor as a preserving fruit.

June Bud trees of Beauty, Kelsey Japan and Santa Rosa may be had at the same price as yearling trees on either Peach or Myrobohan roots.

Beauty. The earliest of the commercial varieties of Japanese plums. Valuable for market and shipping. Heart-shaped; skin crimson sprinkled with white dots; flesh amber streaked with scarlet, excellent flavor. Adapted to itself to most any location, a heavy bearer, and most prolific bearer; self fertile. Season early June.

Climax. Ripens middle June; a good shipping and local market plum. Fruit heart-shaped and uniform in size; skin deep vermilion red in color; flesh yellow, firm, fragrant and of excellent flavor. Tree vigorous and productive. Fine for planting in the warm interior sections.

Formosa. Blooms late, thus escaping early spring frosts; a good keeper and shipper. Fruit large and heart-shaped; skin smooth and a light cherry red in color; flesh pale yellow, firm, sweet, and of a delicious apricot flavor. Tree robust and productive; requires pollination with either Wickson or Santa Rosa. Season, July.

Gaviota. Another Burbank introduction of real merit; fine for market and shipping. One of our best plums. Fruit large and oval, pit very small, nutlets easily extricated; dark red on a yellow background, very showy; flesh firm, yellow, sweet, fragrant, aromatic, and of a fine delicate plum flavor. Tree a good grower and bearer. Should be pollinated with Beauty and Wickson.

Kelsey Japan. A fine shipping and market variety ripening in September. Fruit large, cordate, conical and uniform; skin thick, green, turning to orange red at top when fully ripe; flesh delicate yellow, firm, juicy and sweet. Tree an early and regular bearer but a medium grower. Fruit will keep well for a long time after detempering, affording a long marketing period.

Santa Rosa. This plum runs remarkable fine, even in size, is smooth and clear of defects. Fruit large, conical, uniform in size; skin purplish crimson in color with a pale yellow bloom; flesh yellow, soft and tender, and of a marked pineapple flavor. Tree an upright robust grower and good bearer; self pollinating. Most attractive of all plums on account of its brilliant color. Middle June.

Satturana. (Blood Plum.) Fine for culinary purposes, and particularly preserves. Fruit large and almost round in shape, pit small; skin dark red; flesh red in color, firm, juicy, and of fine flavor. Tree medium to large, upright and spreading, and a good average producer. One of the most popular home orchard varieties. Season, July-August.

Shropshire Damson. A late August variety; desirable for home canning and local market. Fruit oval and medium to large in size; skin thin, purplish-black overspread with a thick bloom; flesh greenish-yellow, juicy, tender, firm and agreeably tart. Tree very productive and a regular and persistent bearer. Very popular for home use; demand invariably exceeds the supply.

Simon Plum. Syn. Prunus Simoni. One of the best of the foreign plums for fruitage and market. Fruit large, in shape resembling a tomato; skin a rich crimson-purple color; flesh yellow firm, sweet, with a marked pineapple flavor. Tree thrifty and an early grower. Season, July.

Tragedy. Probably classified as a prune because of its shape. A plum in ever sense of the word. Valued highly as a dessert fruit and for shipping. Skin dark purple; flesh cream shaded yellow, firm, sweet and juicy. Season early July.

Yellow Egg. Well and favorably known for home use and canning. Fruit medium to large and oval in size; skin dark purple and covered with a white bloom; flesh deep yellow, firm, juicy, good flavor but rather acid. Tree large, hardy, round-topped, open and productive. Popular with the commercial canners on account of its rich golden color. Season, August.

BURTON PETITE D'AGEN

THE PRUNE

Burton Prune (New). This is pre-eminently a drying fruit, meeting every requirement of a superior dried product, as the following particulars clearly show.

Season—Middle August-September. Quality—Distinctly drying, through in a limited way also desirable in the fresh state. Fruit—In type like the French prunes; Petite d'Agen; but in size the largest and best drying commercial prune yet introduced; in shape ovate, peaked at the base. The remarkable size the fruit attains on upland or irrigated land in the Vacaville Valley is a pronounced factor in its favor. Skin a rich violet purple covered with a light blue bloom; Flesh a rich golden yellow, fine grained, tender, sweetly aromatic, and of a pronounced size the fruit attains on irrigated land in the Vacaville Valley is a pronounced factor in its favor; Skin a rich violet purple covered with a light blue bloom; Flesh a rich golden yellow, fine grained, tender, sweetly aromatic, and of a fine delicate plum flavor. Tree a good grower and bearer. Should be inter-planted with XX French or French Improved for pollination.

Double XX French. The famous prune of the Saratoga; Santa Clara County district. Fruit of fine shape and good size; skin a deep purple blue overspread with a light blue bloom; flesh abundant, sweet and sugary; yielding a very high sugar content; pit small and somewhat flat. Dries to the large sizes. Tree strong, upright grower, free branching and free fruiter. August.

French Improved. A fine commercial sort, averaging 30-40's to the pound over a series of years. Fruit true to type and identical with the well-known French prunes; skin of good texture, dark blue in color; flesh clear golden yellow, firm, fine grained and high sugar content. Trees vigorous and productive. Season, August.

Hungarian Prune. Syn. Grosse Prune d'Agen. This variety invariably brings good prices on the Eastern market in the fresh state. Fruit large, ovate, tapering to the stalk, good shape and regular; skin good protective quality, reddish violet with brown dots and covered with bloom very showy; flesh abundant, good grain, juicy and of a sprightly flavor. Tree a strong grower and regular bearer. Season, August-September.

Robe de Sargent. Valuable both for drying and preserving. Fruit large to medium and somewhat oval; skin deep purple and covered with a thick blue bloom; flesh greenish-yellow, sweet and of good flavor, sugary. Tree a vigorous grower, well clothed with foliage, and therefore desirable in all sections.

Sugar. Extremely early, very large, tender and sugary. Tree an unusually vigorous grower and very productive. Skin dark purple covered with a thick white bloom. It is distinguished as a heavy bearer. Season early August.

GROW PLUMS AND PRUNES—SELL YOUR SURPLUS.
THE APRICOT

The apricot thrives particularly well in the coast counties as well as in the warmer interior valleys. The fact that the apricot ripens so far in advance of the prune and at a time when there is no danger from rain should prove an incentive for prune growers to plant them in connection with their prune orchards.

For canning, evaporating and drying, and as well as in the fresh state this fruit can hardly be excelled.

Blenheim. Season, middle June; quality canning, drying and home use. Fruit round-oblong or round-oblale, above medium size, sides compressed; skin clear orange yellow with bright red blush, tender and free; flesh clear orange yellow, juicy and sweet. Tree an early and regular bearer. Extensively planted in all parts of the State.

Hemskirke. Especially desirable for home canning and local market. Fruit large, round or round-oblong, compressed; skin of good protective quality; color orange yellow with brown spots, pink blush on sunny side; flesh clear yellow, melting, juicy, and plum-like flavor. Tree large, spreading, healthy and productive. Said to be a varietal strain of Moorpark. Fine for home planting. Season, June.

Newcastle Early. A California introduction, valuable for its earliness and fine shipping qualities. Fruit medium size and round in shape; skin lemon yellow with pink orange blush on sunny side; flesh deep yellow, juicy, bitter and sweet, rich. Tree a good grower, with large and abundant foliage.

Routier's Peach. A popular apricot in the Sacramento and San Joaquin Valleys. Dries a deep golden yellow. Fruit extra large, somewhat flattened on sides; skin orange yellow, mottled and splashed with red on sunny side; flesh saffron-yellow, juicy, fine grained, good apricot flavor. Tree a good grower, vigorous and productive. Season, middle June.

Royal. A French variety which is widely popular in California among canners and fine as a dried product. Fruit large, oval, slightly compressed; skin medium yellow with orange cheek tinged red with a scattering of darker dots; flesh deep yellow, firm, juicy, of fine quality. Season, middle of June.

Tilton. A chance seedling first noticed on J. E. Tilton's orchard in Kings County. Fruit large, symmetrical, freestone, skin orange yellow tinged shell pink on sunny side; flesh clear yellow, fine grained, and very firm. One of our best canning and drying sorts. Particularly adapted to the hot interior valleys. July.

THE PEACH

The California peach needs no introduction. Our list comprises all of the desirable varieties for commercial and home orchard plantings.

We can furnish June Bud trees of the Alexander and Mayflower at the same price as yearling trees.

Alexander. Widely grown as one of the best early varieties. Fruit large, round, and sides equal; skin greenish-white with deep maroon shading, separations readily from the pulp; flesh greenish-white, juicy, melting and of a piquant and sweet flavor. Tree hardy, robust, upright-spreading and free fruiting. Fruit commands good prices in the Eastern markets. Season, June.

Admiral Dewey. Season, middle June; quality early market and dessert. Fruit roundish in shape but somewhat irregular, with medium sized pit; skin orange yellow blushed with dark red, tender and adhering; flesh yellow, veering to red toward the pit, juicy, melting, sweet and of a pleasant flavor. Tree large, vigorous, upright-spreading and productive.

Bilyeu's Late. Does especially well in the foothill regions; fine for local markets and home use. Fruit round, regular and large; pit rather large and free; skin greenish-white with red cheek on sunny side; flesh white, firm, juicy, sweet and of good texture. Tree vigorous and productive. Season, October.

Brigg's Red May. A California variety of special value for local market and home use. Fruit round or round oblong, large, pit rather small and nearly free; skin pale green with bright red cheek; flesh white, melting, juicy, sweet. Tree round-topped, spreading and robust. Season, middle June.

Early Crawford. Widely planted in California; quality, shipping, home use and local market. Fruit round or round oblong, large, pit medium small and free; skin deep yellow with rich red cheek; flesh deep red strongly tinged with red near the pit, firm, tender, juicy, and decidedly "peachy" in flavor. Tree large, vigorous and prolific. Season, July.

Elberta. The leading shipping peach in the United States; California's prime favorite for shipping, drying and canning. Fruit round-oblong or oblate, compressed with a slight bulge at one side, pit free and sharp pointed; skin greenish or orange yellow overspread with red, good protective quality and separates freely from the pulp; flesh yellow stained red near the pit, tender, sweet to subacid and sprightly. Tree of uniform habit, a strong grower and good bearer. Season, July.

 APRICOTS—EVERY HOME SHOULD HAVE A TREE.
FANCHER CREEK NURSERY

SINCE...1844

DELICIOUS PEACHES—SO EASY TO GROW—REAP THE PROFITS

PEAK CLING

Foster. Popular and widely planted in California; an excellent variety for home canning and drying. Fruit extra large, round-cordate, pit small and free; skin clear yellow with a pronounced blush; flesh yellow, firm, creamy-white, slightly tinged with red on sunny sides; flesh clear yellow to the pit, firm, good grade and fine flavor. Tree upright, spreading, heavy producer. Our trees are propagated from the original Palora orchard near Stockton. Season, late August.

Peak Cling. An introduction from the San Joaquin Valley, originating at Selma, particularly a canning peach. Ripens between Tuscan and Phillips. Fruit round-oval, large, pit small; skin a golden yellow slightly tinged with red on sunny side; flesh clear yellow to the pit, firm, and of excellent flavor. Tree an upright grower and a heavy bearer. Season, late August.

Phillips Cling. Popular because ripening so that harvesting will cover two weeks without falling from the trees. Fruit round-oblong and uniform in size, pit ovate and quite small; skin a pronounced yellow with bright red tinged on sunny side, thin and somewhat adherent; flesh yellow, to the pit, firm, fine grained, and of an excellent flavor. Tree very large, upright, healthy and productive. Recognized by the trade as the best late canning peach. Season, middle September.

Salway. The standard late peach of California, valuable for table use and preserving. Fruit round-cordate, bulgy near the apex, pit ovate, plump and free; skin greenish-yellow, brownish-red blushed, splashed with dark red, thin, adheres to the pulp; flesh clear yellow, tinged with red near the pit, tender, sweet, and of good quality. Tree of medium size, upright, with a dropping tendency, productive. Season, late September.

Seller's Orange Cling. A fine canning and shipping variety ripening in early August; popular in the Sacramento and San Joaquin Valleys. Fruit large to very large, round-oblong, somewhat flattened; pit medium size; skin a rich golden color, with a faint tinge of red on sunny side; flesh deep yellow clear to the pit; firm, juicy, sweet and rich. Tree large, good grower and cropper and upright-spread.

Strawberry. Due to its long ripening period it can be recommended for home planting. Fruit large size, round-oblong and regular; pit oval and red; skin pale yellow marked with dark red; flesh white, melting, juicy and vinous in flavor, red from the pit. Tree a good grower and free fruiting. Season, July-August.

Mowry's Strawberry Cling. The best white cling for home use. Fruit large and oval; skin whitish-yellow marked with red and somewhat downy; flesh firm, creamy-turning to pink at the pit and of fine flavor. Tree a strong grower, and heavy producer. Season, September.

Tuscan. Syn. Tuskena, Yellow Tuscan. Season, late July; quality canning. Fruit round, large and uniform; pit of medium size; skin yellow with dark red cheek; flesh evenly yellow to the pit, solid, sweet and vinous. Tree large, open, robust and productive. The earliest of the commercial canning varieties, affording ready money to the growers.

Yellow St. John. One of the best of the early peaches. Fruit large in size, roundish, orange-yellow color with deep red cheek. Juicy, sweet, and a perfect freestone. Recommended for the home orchard as well as for commercial plantings. Late June.
THE NECTARINE

There is a prevailing opinion among many people that the nectarine is a hybrid, the result of crossing the peach with some other fruit, while really it is nothing more nor less than a smooth skinned peach of extraordinary flavor.

For canning, drying, and shipping, it has so many points in its favor that it is difficult indeed to comprehend why planters have not engaged in nectarine culture more extensively than they have.

Gower. An introduction from the San Joaquin Valley. Because early the Gower nectarine invariably commands good prices on the Eastern markets. Fruit large and round; skin a pronounced yellowish-green overspread with a mantle of deep red; flesh a creamy white tinged with green, reddish pink at the pit, juicy, firm, good vinous flavor. Tree a strong grower and good bearer. Season, early July.

Humboldt. Season, August; quality local market and home use. Fruit large, oblong-oval and reasonably uniform; skin yellow orange, stained and streaked dull red; flesh yellow orange, tender, juicy, red to the pit, sweet, rich and aromatic. Tree a robust grower and consistent bearer. Valuable for home orchard planting.

New White. Commended wherever nectarines are grown in California hence widely planted. Fruit quite large and nearly round; skin greenish white with an occasional touch of red; flesh white, tender, juicy with rich vinous flavor. Tree a good grower, upright spreading and free fruiting. Season, early July.

Stanwick. An English variety of excellent qualities, being a good shipping and drying variety. Fruit large, round-oval, heart shaped at the base; pit rather large; skin pale green, purplish red or violet on sunny side; flesh white, tender, juicy, aromatic and delicious. Tree of medium size, vigorous and compact with dark green foliage. Fruit like the Stanwick will encourage nectarine culture wherever its fine qualities become known. Season, early July.

Victoria. Popular in the East. In California recognized as a drying fruit and for shipping. Fruit medium large and round-oval, small pit; skin greenish-yellow, crimson on the sunny side; flesh medium firm, mealy, flavor of the best. Tree a strong grower and a heavy bearer. The dried product is attractive because nearly transparent. Season, August.

THE ALMOND

Almond trees are budded on almond and peach roots, never on apricot root. The peach root should always be given the preference on loamy, compact soils, which are retentive of moisture. A well-drained warm soil and a locality where there is not too frequent an occurrence of frost in the spring are the requisites to make almond culture a success. Cross-pollination is an interesting phase of almond culture and alternating three to six rows of a variety has a very marked effect on improving the yield.

June Bud trees of Drakes Seedling, Texas Prolific, Nonpareil, Ne Plus Ultra and I. X. L. can be furnished on Almond root at the same prices as yearling trees.

Drake's Seedling. Nut of medium size, large and easily hulled; shell medium soft, of good color and substance; kernels large and plump and of good flavor. Tree spreading, a good grower and cropper, fine for borders or planted singly on account of its uniform habit of growth and fine foliage of a rich light green color; valuable as a pollenizer.

IXL. Nut large and readily hulled, no machine required; shell soft smooth, and of good color; kernels single, large and plump and sweet. Tree a strong upright grower and good cropper. In this as in other varieties, it is advisable to alternate stocks of three to four varieties to encourage cross-pollination.

Nonpareil. Nut large, long and narrow; shell thin and of good color; kernel long, filling the shell completely; and of excellent quality. Tree a spreading habit, medium size and free fruiting.

Ne Plus Ultra. Nut of good size, long and tapering; shell soft and hulls easily; kernel single, large, sweet and highly flavored. Tree a strong grower. An old and standard variety.

THE NUT FRUITS

Nut trees are admirably adapted to boulevard and roadside planting, giving a beauty to the landscape in addition to their economic values for their crops of edible nuts. In Europe a large per cent of the nut crops in the Mediterranean region are the result of roadside plantings. A similar practice can be advantageously followed in the adornment of California highways by the use of nut bearing trees.
THE CHESTNUT

This nut tree does best when planted on river bottom land; nevertheless good specimens may be seen at different points throughout the state growing in soils varying from sandy to loamy, and even heavy clay. The requisite being plenty of moisture with subsoil that will permit free root penetration.

4 to 6 grade ........................................ $ 1.50
5 to 4 grade ........................................ $ 1.25

Italian. Syn. Spanish. Nuts large and bullet shaped; shell thin and a handsome shade of brown in color; kernel large, plump, full and sweet. Tree a strong grower, finely spreading umbrageous top; highly ornamental and well suited to roadside plantings and the adornment of parks and gardens.

THE WALNUT

No nut yields larger or more profitable crops than the walnut. While it prefers a rather loamy, deep rich soil and responds quickly to good cultivation, it yields excellent crops even under adverse conditions.

The walnut makes a splendid shade and sidewalk tree and should be given due consideration in making up your planting list. The varieties which we list are adapted to climatic conditions of the San Joaquin and Sacramento valleys.

Eureka. Nut large and fair in color, elongated; shell smooth, medium thick and well sealed; kernel cream color, medium plump, cracks out easily whole and is of good flavor. Tree a vigorous grower, clean branches, open top, bark slightly rough, tinged red, not subject to sunburn.

THE FIG

A glance at the literature of the fig will reveal the existence, from a botanical standpoint of hundreds of varieties; but commercially the number grown in California are but few. The dominant varieties are divided into two classes, viz: the Smyrna types which require pollination and the Adriatics which mature figs without pollination. Our list comprises only those of recognized commercial importance.

SMYRNAS

Calimyrna. (Genuine Smyrna.) A name originating with us to give distinction to the real Smyrna fig after the introduction of the fig wasp. Fruit large very large, turbinate, pyriform, very short, stalk short, ribs distinct, orange or medium, of a pale ochre color and widely opened when the fig is matured or before shriveling; skin lemon yellow; flesh reddish amber, sometimes pale amber, turning to dark amber just before falling. Flavor and quality unsurpassed. To grow this variety successfully it is necessary to have the aid of the wasp Blastophaga grossorum; which dwells in the wild or Capri varieties and conveys the pollen into the edible fig.

ADRIATICS

Mission. Syn. California Black. The oldest and most popular shipping and drying variety grown in California, being an introduction of the Mission Fathers in the last century. Fruit medium large, turbinate, long necked and short stalk, ribbed, eye pronounced, skin rough, mahogany violet; flesh good grade, dull red or brownish amber, sweet and of good flavor. Tree a strong grower, spreading head and regular bearer. Does well in any situation. Season, midsummer.

White Adriatic. A splendid drying sort for the interior, though not so good in sugar content as Calimyrna. Fruit medium size, roundish, stalk short, neck medium, eye open with red iris; skin thin, greenish-Yellow; flesh red or white with violet streaks, quality good. Tree a good grower and regular cropper. Season, August.

Roseding's Caprifig No. 1. Particularly valuable on account of producing the crops necessary for successfully carrying through all the generations of the Blastophaga. A rapid grower and produces an abundance of all crops.

Roeding's Capri No. 3. Figs of the Proschri crop very large, heavily ribbed and developing a larger number of galls with insects than either of the other two varieties; much heavier and more closely jointed than Nos. 1 and 2; leaves small and serrate. The first figs ripening June 8. A rather uncertain bearer of the other crops.

Capri Stanford. This fig is large, and ripens about the same time as Roeding Capri No. 3. It capsriples well and always has a good over-winter crop of Munme figs. The tree is a dwarf grower, but a heavy producer of Proschri figs.

EUREKA WALNUT

The best for the Interior Valleys

NUT TREES FOR BEAUTY AND PROFIT.

12
THE LOQUAT

A beautiful evergreen shrub or tree attaining a height of fifteen to twenty feet, bearing pear-shaped fruit of a pleasant acidulous flavor and of lemon-yellow color. The fruit is used for making jellies, jams and preserves. Trees are easily grown and may be planted 20 to 24 feet apart.

Gallon container, 2 to 3 ft. $ 1.00
Five gallon container, 3 to 4 ft. $1.50

Select Seedlings. Fruit medium, borne in immense clusters, varying in color from yellow to deep orange. Flesh melting, juicy and sweet.

THE OLIVE

The olive does well in all sections of California, as we possess a similar soil and climate to its native habitat the Mediterranean region. Olive trees are now a pronounced feature of our California landscape being used extensively as border and avenue trees, and are not only very ornamental but profitable as well.

PRICE EACH

1 to 4 Trees $1.50
5 or More $1.25

Select Seedlings. Fruit medium to large, uniform and regular; skin smooth, fine grained, and good substance; flesh abundant, juicy, little pulp, and decidedly acid. Tree a good grower and prolific bearer, blooming and setting fruit every month of the year, nearly thornless; a heavy cropper in summer when its fruits are in greatest demand.

1/2 inch Caliper $2.50
5/8 inch Caliper $2.75

Eureka Lemon. A California variety originated by C. R. Workman of Los Angeles. Fruit medium to large, uniform and regular; skin smooth, fine grained, and good substance; flesh abundant, juicy, little pulp, and decidedly acid. Tree a good grower and prolific bearer, blooming and setting fruit every month of the year, nearly thornless; a heavy cropper in summer when its fruits are in greatest demand.

1/2 inch Caliper $2.50
5/8 inch Caliper $2.75

CITRUS FRUITS

Taking inception in the warm belt of Southern California, citrus culture has gradually found its way farther north year by year until now these trees are successfully grown within the very shadow of Mount Shasta. There are few soils in California where the citrus trees will not thrive, though they are partial to a friable sandy loam, retentive of moisture but well drained. Like the olive, citrus trees are also being planted for their landscape effect. The golden and yellow fruits contrasting against the dark green foliage of the trees add beauty to any landscape.

THE FIG—ALWAYS POPULAR, FRESH, PRESERVED OR DRIED.

Mission. The oldest variety grown in California, and one of the best. Fruit medium to large and oval in shape, pit medium in size; skin deep purple veering to black; flesh abundant, firm, of good texture and oil content. Tree handsome and upright, productive; valuable for roadside and border planting. Season, October.

Manzanillo. A splendid pickling and oil making variety. Fruit nearly round, large, with a round-oval pit; skin a pronounced purplish black, covered with specks of a lighter shade; flesh solid, good grain and oil content. Tree hardy, robust and free fruiting. Earliest variety to ripen. Season, October.
Valencia Late Orange. The great summer market orange of California. Fruit oblong-roundish, medium and regular in size; skin pale yellow, fine grained and good protective quality; flesh ample, juicy, crisp, amber in color and decidedly aromatic and sweet. Tree large, good and regular bearer. Season, April-September.

Washington Navel Orange. The orange that made Riverside; the place of its introduction: famous. Fruit medium to large, solid and heavy; skin of fine texture and substance, smooth with a kidglove surface and bright orange in color, flesh juicy, melting, sprightly sweet and agreeable, and practically seedless with no rag. Tree a good bearer, medium thorny and a healthy grower. Season, November to March.

THE POMEGRANATE

The Wonderful pomegranate finds conditions to its liking in the San Joaquin valley, where a number of commercial orchards are proving quite profitable, the bulk of the crop being sent east. In addition to its economic values the pomegranate also possess distinction as an ornamental tree. Its glossy green foliage contrasts beautifully with its scarlet red flowers; later the large magenta red fruits appear like crimson globes among the leaves, while as a packed product they form a conspicuous feature on city fruit stands. Our strain of trees are grown from cuttings carefully selected from and cut from record performance trees, hence are dependable from every point of view.

Mu Shing Hong. "Chinese Date." Season, September-October; quality home use, preserving and confections. Fruit long pear-shaped; skin smooth and a reddish mahogany in color; flesh fine grained and when processed flavored like the date. Tree thrifty, good cropper and does well in soils heavily impregnated with alkali.

THE JUJUBE

A comparatively little known fruit from China, where it is known as the Chinese Date, because when processed it much resembles that fruit. Tree upright spreading with dark green glossy foliage, rendering it desirable for ornamental planting. The method of processing is simple. First select good firm fruits. After passing them over a pricking board to perforate the skin, they should be placed in a syrup composed of one cup of sugar to one cup of water and boiled for twenty minutes. They should then be removed, the syrup permitted to drain and placed on drying trays in the sun for two or three days. They will then not only have the appearance of the date but will have a flavor even superior to it.

Fu-yu. Without doubt the finest persimmon yet introduced into this country. Because of its non-astringent qualities, compact firm flesh, splendid shape and the fact that it is a good shipper, we believe it is destined to become the leading commercial variety in the United States. The fruits are of medium size, somewhat flattened and of deep red color; resembling a tomato somewhat in appearance. Owing to limited stock this season we cannot supply over two trees to a customer. Price each $2.00.

Hachiya. Season, October; quality drying, market and home use. Fruit large, oblong, conical pointed toward the apex; skin bright red with dark dots or blotches; flesh ample, melting, buttery, aromatic, pleasantly astringent and sweet. Tree a good grower, spreading and free fruiting. The recognized commercial variety in California.

Fuyu. Without doubt the finest persimmon yet introduced into this country. Because of its non-astringent qualities, compact firm flesh, splendid shape and the fact that it is a good shipper, we believe it is destined to become the leading commercial variety in the United States. WONDERFUL POMEGRANATES

Valuable for its superb fruits, handsome foliage and gorgeous flowers

Why depend on someone else to grow your fruit?
Grape culture is not only the oldest commercial fruit in California, but in volume and value of product, in acreage planted and in amount of capital invested, the largest and most widely cultivated. By reason of soil and climate all classes of grapes do well in California, clearly putting the state far in the lead as a grape-growing region. The San Joaquin and Sacramento valleys, veritable empires in themselves, produce the major portion of the table, raisin and wine varieties. The coastal regions grow the juice or wine sorts mostly. Fresno is the recognized center of the raisin industry in this country and annually markets more of this product than any other city in the world. The growing of grape vines has for over forty years been a leading division of the Fancher Creek Nurseries.

Our stock of vines are grown on new land, causing them to have a fine, vigorous root system.

#### TABLE VARIETIES

**Black Monukka.** A splendid raisin, shipping and table variety. Berries seedless, medium size and decidedly elongated and borne on large cylindrical clusters; skin thin, nearly black when fully ripe; flesh solid, amber yellow, sweet and juicy. Vine a strong grower, prolific when long pruned, either cordon or half cordon. Season, July.

**Black Corinchon.** Syn. Red Corinchon. Desirable for its handsome appearance, late ripening and shipping qualities. Berries long, borne in long, loose bunches; skin thick, dark and spotted, covered with bloom; flesh firm and good. Vine a medium grower, short jointed wood, large leaves; a good bearer. Season, October.

**Black Hamburg.** A great favorite as a juice and table grape. Berries large round oval; skin rather thick, dark purple, becoming black when fully ripe; flesh firm, very juicy, sweet and vinous. Vine a good grower and cropper. Season, late September.

**Black Prince.** Syn. Rose of Peru. Season, September. Valuable for home use and shipping. Berry large, round, borne on shouldered clusters; skin brownish-black with a thick bloom; flesh dark, juicy and sweet. From a standpoint of growth and production is in a class by itself.

**Emperor.** An excellent shipping table grape of wide culture in the Sacramento and San Joaquin Valleys. Berry long, oblong and large, borne in heavy bunches; skin deep rose colored covered with bloom and thick; flesh crisp, abundant and of good flavor. Vine a strong grower and heavy bearer. Used largely for storage, packed in drums with redwood sawdust. Season, October.

**Flame Tokay.** The most extensively planted shipping grape in California; in some sections does not color up well. Berry large and oblong, borne in immense bunches; skin pale red covered with fine bloom; flesh firm, juicy, cracking, abundant and good vinous flavor. Vine a good grower, robust, with light green foliage. Season, September.

**Fresno Beauty.** Another name for Gros Colman, one of the recognized hot house grapes of Europe. Season, October; quality table and local market. Berry large as a Damson plum, set on a loose cluster; skin thin dark, covered with bloom; flesh firm and of a pleasant vinous flavor. Vine a strong grower, with large, dark green, glossy leaves, downy beneath; a wonderful producer.

**Malaga.** The popular California white grape for Eastern shipments. Berry of good size, oval in shape, borne on loose clusters; skin tender yellowish-green; flesh sweet, tender, cracking and good flavor. Vine a strong grower and productive. Season, August.

#### RAISIN VARIETIES

**Muscat.** The renowned raisin and table grape. Berries large, slightly oval, produced in large clusters; skin pale amber covered with a thin white bloom; flesh firm, with a very distinctive aroma and pleasing flavor. This variety has the remarkable faculty of producing a second crop of grapes even more desirable for shipping than the first. Season, September.

**Thompson's Seedless.** This is the celebrated Sultana Blanche of Asia Minor. Immense quantities are now being used in broods, cakes and for confections. It is much in demand for shipping. Berry oval and seedless on long cylindrical clusters; skin greenish-yellow; flesh abundant, mildly flavored. Vine a vigorous grower. Should be cane pruned. Valuable as an arbor grape. August.

#### JUICE VARIETIES

**Alicante Bouschet.** Our most popular juice grape. Berry medium round, borne in compact bunches; skin black and thick; flesh high in sugar, juice red, somewhat tart. Vine medium grower and an enormous producer; comes into bearing early. Fruit used largely for coloring soft drinks, ices, confections, etc. Season, September.

**Black Malvoise.** Widely grown in California as an early wine grape. Berries medium size and oblong, borne on loose branching bunches; skin reddish black with faint bloom; flesh firm, juicy, sweet and of good flavor. Vine vigorous and productive. Also desirable as a dessert fruit. Season, August.

**Carignan.** One of the leading wine grapes. Berries very large and round, borne on medium sized, compact clusters; skin a deep blue-black and tough; flesh amber, very juicy and sweet. Vine a strong grower, heavy bearer and adapted to a wide condition of soils and climate. Brings high prices as a wine making grape for Eastern shipments.

**Missouri.** A wine grape. Berry medium size and round; skin purple black; flesh cracking, sweet and delicious. Vine a good grower and free fruiting. This is the original wine grape introduced by the Padres in the early gardens of the California Missions. Season, September.

**Zinfandel.** Widely used as a juice grape. Berry round borne in compact clusters; skin dark purple covered with a heavy bloom; flesh abundant, juicy, and a good vinous flavor. Vine a medium grower and good bearer. Season, August.

**Maraville de Malaga.** (Red Malaga). One of the few hard grapes noted for its fine flavor and aroma; commands good prices in the Eastern...
and general satisfaction. Thrives well on a light and heavy, compact soil, and grows luxuriously on a soil containing a large percentage of lime. It is better adapted to moist than to dry soils. Grafts well.

Riparia Clorlie de Montpellier. It does well in California, where conditions are favorable for its development. Growing well in very shallow soils, providing they have the necessary amount of fertility. It is not suited to dry compact soils, but should be planted in moist alluvial soils.

Rupestris St. George. Adapts itself to a great range of soils, does equally as well in a moist, very heavy compact clay soil as in the driest hilly soils provided they are deep, having the remarkable faculty of sending its roots straight down in search of moisture. In rich virgin soils they must be generously pruned to allow plenty of wood to bear the fruit and regulate the vegetation. Will thrive in soils with a moderate amount of lime but should never be planted in shallow soils.

Mourvedre X Rupestris, 1202. Gives assurance of being a valuable stock. Partly adapted to alluvial as well as compact, heavy soils underlay with lime formations.

Riparia X Rupestris, 3309. (Couderc). Will withstand a very large amount of lime, and thrives in the driest locations; does equally well in a compact clay, or in gravelly soil, where the water is not too close to the surface.

Riparia X Rupestris, 3306. Will thrive in soils having a large percentage of lime, hence is particularly recommended for moist soils.

AMERICAN VARIETIES

The criticism that the American grapes fail to bear in California is not in keeping with the facts, for experience has demonstrated that when properly cared for good crops are the rule. They are especially desirable for arbors and to run over unsightly outhouses and should be planted much more largely than they are. All do well in all sections of the Pacific Coast, and in California are partial to the coastal regions and the higher mountain plateaux. The vines do not require the severe pruning that some of the European varieties do. We list the best of the black and red sorts. Our stock is grown in a suitable soil for producing vigorous vines and a strong root system.

Agawam. A favorite local market variety. Fruit large on medium compact clusters; skin curmín red in color and very attractive; berries large and sweet tender pulp, and has that decided “Concord” flavor. Vine robust with large foliage, a good cropper.

Catawba. A splendid table and shipping grape. Berry medium size and round on medium sized clusters; skin thick, pale red, deepening as it ripens; flesh glutinous, juicy, sweet and musky. Vine productive and hardy. Season, September.

Concord. The standard table grape of the Eastern states; fine for its juice and jelly making. Berry round and solid on medium sized compact clusters; skin thick, blue black; flesh somewhat coarse, abundant, with a decided musky tang. Vine productive and relatively immune to disease. One of the best in the American class. Season, August.

FORTY-SIX YEARS AGO THE NURSERY WAS FOUNDED ON THE BANKS OF FANCHER CREEK
THE BUSH FRUITS

This term usually applies to the berry family—Blackberries, Raspberries, Currants, Gooseberries, Strawberries, etc. The whole Pacific slope, wherever fruit soils and sufficient moisture prevail is adapted to their successful culture. In California there is almost a continuous growth and intermittent cropping can be carried on almost during the entire year.

Mammoth Blackberry. A superb local market and shipping variety. Fruit long, full and large; color a deep purple glossy black; flesh abundant juicy, and of a delightfully sweet blackberry flavor. Canes are good growers and enormously productive in early spring.

Cory’s Thornless Blackberry. Valuable and pre-eminently fine for local market, shipping and culinary purposes. Fruit very large, sometimes two inches long, core small; skin tender, color glossy black; flesh sweet, delightfully acidulous flavor piquant and suggestive of wild raspberry, heavy and firm. Vine vigorous, sending out strong, stocky canes in early spring, which are absolutely thornless; thrives in any good garden soil. Season, May to August.

Lucretia Dewberry. The dewberries or trailing blackberries are very popular, both as a home fruit and the local market. Berries extremely large and good substance; color a rich glossy black; flesh sweet, melting and of fine flavor. Vine a good grower, dense foliage and good bearer. Plants should be set four feet apart, and the rows six feet. Season, May.

Loganberry. Distinctly desirable for shipping, local market, and culinary purposes and summer drinks. Fruit large round elongated and solid; color a deep purplish red; flesh abundant, deep red in color with a pleasant, tarty flavor suggesting a blend of blackberry and raspberry. Vine a vigorous and rampant grower and very prolific; should be trellised or staked. Season, May.

Youngberry. A comparatively new berry on the Pacific Coast although it originated in Louisiana on the B. M. Young ranch nearly 20 years ago. Is said to be a cross between the Dewberry and Loganberry, purplish black in color, large in size, and with a flavor similar to the Raspberry. The berries are very sweet and make excellent preserves. A prime favorite with the bakers. The vines are strong growers and very productive.

Rhubarb, Wagner’s Giant. It is a strong, rapid grower and very productive. Stems extra large, unsuperseded in flavor and yields muc heavier than any of the old time sorts. It will prove a great money maker.
In our collection of flowering and ornamental shrubs, the rose, "Queen of Flowers," occupies first place; hence we have been careful to select only those sorts producing freely of blooms, possessing good substance and strikingly individual characteristics. Hundreds of new varieties have been brought out by rose growers and hybridizers the past few years, but in making up our list we have selected only those which we believe have proven meritorious and worthy of further propagation.

KEY TO ROSE CLASSES

TEA. (T.) Slender of growth and not very vigorous as a rule. Foliage nearly always very glossy. Have tendency to bloom continuously. More tender than Hybrid Teas and Hybrid Perpetuals.

HYBRID TEA. (H.T.) A class of comparatively recent origin and today the most important of all. They thrive almost everywhere but in the colder climates of the eastern and northern states should be given some winter protection. They show a blending of beauty, delicacy and perpetual blooming habit of the Teas with the vigor and great hardiness of the Hybrid Perpetuals.

HYBRID PERPETUAL. (H.P.) Fragrant as a class, and vigorous and upright in growth. Hardy and resistant to cold. Stems are strong bearing the flowers erect. Foliage rough.

POLYANTHA. (Poly.) "Baby Roses." Usually dwarf, flowers borne in clusters.

NOISETTE. (Nois.) Tender climbers of strong growth similar to the Teas.

CHEROKEE, WICHURIANA, (Wich.) and MULTIFLORA. All hardy climbers having as a rule but one main blooming season, though some of the newer hybrids are continuous bloomers.

---

LATE INTRODUCTIONS

Dame Edith Helen. (H.T.) (A Dickson & Sons, 1926) A new and brilliant pink rose of immense size and exquisite form. The buds are borne on long stiff stems, and open slowly to large perfectly formed flowers. The color in all stages from the opening of the bud to the falling petal is an even shade of brilliant pink. Its wonderful fragrance won it the Clay cup in England in 1926 for the best sweet-scented rose shown that year. Every rose grower should have this splendid new rose. Price $1.50.

Etoile de Feu. (H.T.) (Perret-Ducher, 1921) A low growing bushy plant producing an abundance of globular buds that open to large cupped flowers of flaming orange-salmon. The blooms are very double and the inner petals beautifully frilled and crinkled. The best formed of the many new fire-colored roses. Bright glistening foliage and very resistant to mildew. Price $1.00.

John Russell. (H.T.) (Dobbie & Co., 1924) An upright growing bush bearing enormous blooms of dark velvety crimson color. The flowers are full and of good form, borne on long straight stems. One of the best red roses. Price $1.00.

Margaret McGredy. (H.T.) (McGredy & Son, 1927) Large semi-double blooms of orange-scarlet and oriental red changing in the mature flowers to carmine-rose make this new variety the sensation of the rose world. The wonderfully beautiful blooms are borne on strong stems that carry the flower upright. The plant is an unusually strong grower and produces an abundance of bloom. Price $1.50.

Mrs. Henry Bowles. (H.T.) (Chaplin Bros. 1921) Glowing Pink flushed with salmon. The flowers fragrant and well shaped are borne in great profusion. The bush is a strong grower and blooms freely over a long period. Price $1.00.

OUR ROSES ARE ALL STRONG NO. 1 PLANTS—WILL BLOOM THIS SEASON
Mrs. F. R. Pierson. (H.T.) (F. R. Pierson, 1926) A dark claret red rose, very sweetly scented, borne on long stems. The foliage is large and abundant. A good garden variety. Price $1.00.

Rev. F. Page Roberts. (H.T.) (B. R. Cant & Sons, 1921) Long buds varying in color from deep apricot-orange to orange and red. Petals of open blooms are of pure golden yellow on the inside and stained on the outside copper and red. Flowers are large and full with a rich fruity fragrance. The gorgeous and unusual coloring of the blooms which are produced abundantly throughout the season, the strong, though somewhat low growth of the bush, combined with bright and abundant foliage, make this rose a leader wherever grown. Price $1.00.

New Climbing Roses

The Queen Alexander. (H.T.) (S. McGredy & Son, 1918) A rose with an astonishing and sensational color combination—intense vermilion on inside and old gold on reverse of petals which spring from a deep orange base. A rose of unusual beauty in all stages from the brilliant buds to the very double open blooms. Its moderate height and free flowering habit make it an exceptionally good bedding rose. Price $1.00.

Una Wallace. (H.T.) (S. McGredy & Son, 1921) An exquisitely modeled rose of luminous old rose color. The medium sized blooms are carried erect on strong, long stems, and are quite fragrant. The bushes are vigorous growers. One of the best roses of recent introduction. Price $1.00.

General Collection

Betty Upchurch. (H.T.) (A. Dixon & Sons, 1922) Buds coppery red; flowers, semi-double; color, a charming salmon pink with the reverse of the petals orange corise. Buds are of good form and borne on long stems. A favorite because of its unique coloring. Price 75c.

Cheerful. All that the name implies. Shining pink illumined with orange and yellow at the base of the petals. Flowers large, full and perfect shape and form. A cheerful and persistent bloomer. Price 75c.

Columbus. (H.T.) Flowers a handsome shade of pink, deepening as they open to a glowing pink, and produced on long, stiff stems. Delightfully fragrant. Price 75c.

Constance. (H.T.) A handsome cadmium yellow; blooms large, full and globular; buds long and pointed, deep yellow streaked with crimson. Foliage glossy green, and the bush is of robust growth, and a profuse bloomer. Price 75c.

Duchess of Wellington. (H.T.) Saffron yellow, stained with a rich crimson changing to a coppery yellow; fragrant; a splendid decorative variety and free flowering. Price 75c.

Eldorado. (H.T.) (Howard & Smith, 1923) A clear yellow rose that holds its color when fully opened. The lovely cupped flowers are very double with petals crinkled at the center of the bloom. Foliage clean and abundant. An exceptionally good garden rose. Price $1.00.

General McArthur. (H.T.) This is probably the greatest favorite of all the garden roses. The flowers are a vivid crimson scarlet and retain their brilliancy when the flowers are fully expanded. Very highly perfumed and practically free from mildew. Bushes are borne singly on long stout stems. Price 75c.

Golden Emblem. (H.T.) (S. McGredy & Sons, 1917) The steadily increasing popularity of this wonderful rose is fully justified by its remarkable beauty. The large, perfectly formed buds are of an even golden yellow. The evenness and purity of color in this rose is most remarkable and it is quite generally conceded to be the outstanding golden rose of the day. The foliage is bright, green and the stems are strong and upright. Price 75c.

Golden Ophelia. (H.T.) An excellent new seedling of the Ophelia. The flower is of medium size, deep golden yellow in the center, paler slightly toward the outer petals; of perfect symmetrical form. The plant is a sturdy stiff-stemmed grower. Price $1.00.

Gruss An Teplitz. (H.T.) There is no better rose grown for hedge purposes than the Gruss An Teplitz. A vigorous grower and when properly trained makes an almost compact hedge. The flowers when first opened are rich and dark crimson, changing to velvety fiery red. Delightfully fragrant and blooms continuously. Price 50c.

Hoosier Beauty. (H.T.) The flowers are of dark glowing maroon with darker shadings, reverse of petals show silver sheen texture like velvet. Double, very pretty in the bud, opens showing yellow stamens. Deliciously fragrant. Leaves dark green, flowers borne on long, stiff, thorny stems. Strong grower, free and continuous bloomer. Price 75c.

Hortulanus Budde. (H.T.) Buds, long and pointed; flowers dark red with a yellow center. Strong, vigorous and branching, always covered with a profusion of blooms. An excellent variety for bedding. Price 75c.

Imperial Potentate. (H.T.) (Clarke Brothers, 1923) This fine new garden rose bears splendidly formed buds of rich rose crimson which open to crisp-petalled blooms of dark shining rose-pink shaded lighter on reverse of petals. Fragrance is exceptionally fresh and fine. Foliage thick and leathery. A strong growing rose that we highly recommend. Price 75c.

Independence Day. (H.T.) Flowers sunflower yellow overlaid with orange-apricot. The buds are gracefully olive shaped, with charming curled petals, foliage glossy dark green. Price 50c.

Irish Elegance. (H.T.) Single bronze pink blooms, which, while expanding, assume varied apricot hues. Blooms abundantly from early spring to end of flowering season. Bush a strong grower. Price 75c.

Irish Fireflame. (H.T.) Orange and Crimson buds, opening to very large single blooms of gold and apricot with pink shadings. Foliage bronze and dark green. An unusually strong growing rose. Price 75c.
Jonsheer J. L. Mock. (H.T.) A beautiful rose in the bud, being full and well formed, and is equally good when it opens up. In color it is a mixture of luscious red and salmon pink, with a silvery reflex. A strong grower. Price 75c.

K. A. Victoria. (H.T.) Finest of all for cut flowers. Produces blooms of enormous size, white, faintly suffused lemon-yellow. Large pointed creamy white buds, strong stems, glossy foliage. Easily the most widely known and popular of the white varieties. Price 75c.

K. of K. Kitchener of Khartum. (H.T.) Semi-double and intense scarlet, with large velvety petals, produced abundantly; vigorous grower and free branching; a rose of distinction and beauty. Price 75c.

Lady Hillingdon. (T.) Flowers a deep apricot yellow which do not fade, blooms large and loose, buds long and pointed; foliage first dark violet turning to green with age; growth strong and vigorous. A valuable rose in every way. Price 75c.

La France. (H.T.) Silvery Pink. One of the finest roses; the color is a most lovely rose, with silver lurex; a constant bloomer and very sweet scented. A rose that has enjoyed a long popularity solely on its merits. Price 75c.

Miss Lolita Armour. (H.T.) One of the most striking color combinations ever seen in a rose. As the flowers expand, they develop to a deep coral-red with a gold coppery-red suffusion, the base of the petals being a rich golden yellow with coppery sheen. The flower is very double and cup-shaped, the vigorous plants are a continual mass of brilliant bloom. Price 75c.

Mme. Caroline Testout. (H.T.) Flowers a bright pink, large size, good shape and fragrant; foliage free and strong; bush a good grower and free blooming. A favorite in the coastal region and the northwest. In the interior valleys it should be given a northern exposure and shady situation. Price 75c.

Mme. Edouard Herriot. (H.T.) (Pernet-Ducher, 1913) Superb coral red shaded yellow at base passing to shrimp red. Flowers large and semi-double, buds perfectly formed and magnificently colored, continuous open. A profusion of exquisitely formed and sweet scented buds of reddish copper and coral tints. The foliage is bright green and forms a fitting setting for this garden gem. Price 75c.

Mrs. Aaron Ward. (H.T.) Flowers Indian yellow, occasionally washed with rose, good form and slightly fragrant; foliage good and reasonably abundant; bush an upright grower with substantial stems, free branching and flowering. Price 75c.

Mrs. W. C. Egan. (H.T.) (Howard & Smith, 1922) Deep flesh color, softly contrasted with a lighter shade of soft pink and with golden glow at the base of petals. The flowers which are borne on long stems last for a long time either on the plant or when cut. A rose of unusually beautiful form. Price 75c.

Mrs. Wakefield Christie Miller. (H.T.) One of the finest and most popular in our collection. Charming flowers of clear rose and light pink, sweetly perfumed. A dependable strong, upright growing rose with large foliage. A free bloomer and one we can highly recommend as a bedding rose. Price 75c.

Ophelia. (H.T.) Salmon flesh shaded with chamois center. A rose that is lovely at any stage. The buds and flowers are beautifully formed and colored, enhanced by a rich veining on the petals. Stems are long and carry the flowers erect. A deliciously fragrant rose. Price 75c.

Padre. (H.T.) (B. R. Cant & Sons, 1921) There is a charm of coloring in this rose that immediately challenges attention—a coppery red, shaded with yellow at base of petals. The fully opened, semi-double blooms with their curiously notched petals of soft, deep rose retain their beauty until the last petal drops. The lovely buds on long, straight stems make it a most attractive cut flower. A great rose standing as a new creation with a type distinctly its own. Price 75c.

Pink Maman Cochet. (T.) A beautiful pink rose with light creamy-yellow center. A vigorous, grower and profuse bloomer. One of the most popular Tea roses. Price 75c.

Red Radiance. (H.T.) One of our best red roses. Flowers are a lovely deep red color, borne on erect stems, and in great profusion. The bush is exceedingly vigorous, considered one of the hardest in the Tea section. Blooms freely and every flower is a gem. Price 75c.

Rose Marie. (H.T.) Stands in the same class as the Hoosier Beauty and Sunburst and is said to be a cross between these two splendid varieties. Flowers are a deep pink, wonderfully perfumed, and of perfect form. A continuous bloomer with long stems and clear green foliage which is mildew resistant. No garden should be without this magnificent rose. Price 75c.

Souv. De Claudius Pernet. (H.T.) (Pernet-Ducher, 1920). Flowers of the most striking sunflower yellow color, deeper in the center; long pointed and exquisitely shaped buds, carried on long stiff stems. A vigorous grower with brilliant green foliage. This rose is sometimes disappointing the first season, but the glorious blooms on a well developed bush amply make up for the imperfect flowers of the first summer. Price $1.00.
and free flowering it has become exceedingly popular. Price 75c.

Feeling (H.P.) A handsome yellow rose with coppery orange shadings, fairly full, cup-shaped, with long pointed buds borne singly on strong stems. One of the best of this color. The flowers are quite fragrant. Price 75c.

White Killarney. (H.T.) It is a sport of the well known Killarney and very similar except it is more vigorous in growth and resists disease better. Flowers are pure white and stays a long time in the bud. Excellent for cutting. Price 75c.

White Marnan Cochet. (T.) White, bushy with shrimp pink on the outer petals, suffused with carmine in the bud opening to a large flat handsome flower with yellow shadings toward the center. The finest of all the coquets. Price 75c.

HYBRID PERPETUALS

Frau Karl Druschki. (H.P.) Sometimes called Snow Queen or White American Beauty. Largest and most popular of the white roses. Blooms six inches across not uncommon. The immense buds are egg shaped, pointed and open into superbly formed white, waxy petalid rose without a tinge of color. Growth strong and vigorous with abundant foliage. Price 75c.

White American Beauty. (H.P.) A medium grower with few thorns. A superb rose and sure to be a great favorite. Price 75c.

Paul Neyron. (H.P.) Pure Rose Red. One of the largest roses in cultivation. The buds are larger than the best American Beauties grown under glass and bear freely in the open ground. Growth is strong and vigorous. A fine Red Rose. Price 75c.

POLYANTHAS (Baby Roses)

CLIMBING ROSES

Belle of Portugal. (H.) Gigantesca. Flowers a soft pink fused with yellow, large, full and loose; a most beautiful climber. Price 75c.

Clg. Cecile Brunner. (Ciz. Poly.) Salmon pink with daintily reflexed petals. Flowers are borne so freely as to often hide the bush. Lush foliage of medium size and good form and substance; foliage light green; growth rampant and vigorous. Price 75c.

Clg. Hoosier Beauty. (Gls. H.T.) (Western Rose Co., 1918) Splendid dark red blooms of perfect form and delightful fragrance. The buds are long slender and of exquisite delicacy of form. The blooms are identical with Hoosier Beauty bush rose. The velvety texture of the flowers borne on strong stiff stems makes it rank among the best of the climbers. Price 75c.

Clg. K. A. Victoria. (H.T.) One of the very best climbing white roses; a strong and rapid grower, making shoots fifteen feet in a season; flowers superb, of good texture and substance, extra large, deep and full very fragrant, and are produced on long stiff stems; buds long and pointed; deliciously fragrant. Price 75c.

Clg. Lady Hillingdon. (T.) Deep apricot yellow. Can be told at a glance from any other rose known; even after the flower is cut the color will deepen. It never fades. Color is solid without any shading and absolutely unique. Growth strong and vigorous. Foliage of a rich dark violet bloom. Flowers large and loose, with long pointed buds and remarkably large petals. Price 75c.

Clg. Los Angeles. (H.) A luminous flame pink with golden shading. A very free flowering rose. The bush and bloom are of exceptionally good form and pleasingly fragrant. The blooms are identical with those of the bush variety except that they are somewhat larger. Price 75c.

Clg. Mme. Caroline Testout. (H.T.) Flowers rose with brighter center, large full and globular; identical with that most beautiful and very fine rose named Caroline Testout. The flowers are of a very rich and deep color, making growth from 12 to 15 feet in a season and an inch through. No garden should be without this magnificent rose. Price 75c.

WHEN PLANTING ROSES—

They should be planted with the junction of the bud two or three inches under the ground. This will prevent suckering and will make a better root system. Spade the earth to a depth of about 18 inches. When planted point the roots down, slanting to the side of the hole. Press the soil firmly around the roots and settle by watering freely. Broken or bruised roots should be removed when planting. Best in mind that roses require a lot of water and especially in dry climates. Use fertilizer as a top dressing. Roses should be pruned while they are in a dormant condition. A light pruning is sometimes advisable between blooming seasons. Keep the dead wood cut out of your rose bushes.

OUR roses are pruned ready for planting when they leave the nursery.

WE BEAUTIFY AND FEED THE WORLD
ORNAMENTAL DEPARTMENT

EVERYONE admires beautiful well-planted grounds. The home without the softening beauty of trees, shrubs, vines and flowers looks bare and uninviting. It has been truly said that “First impressions are always the most lasting,” and the public judge the inside of a home to a great extent by its surroundings. Homes large and small need the finishing touch of trees, shrubs, and flowers. For over forty-six years the Fancher Creek Nurseries have done much research work in an endeavor to learn the shrubs and trees that do well under California conditions and more particularly as they exist in the great interior valleys. You will find listed in this catalogue the very trees you need for your sidewalk and avenue planting. Beautiful flowering shrubs for the foundation lines, borders and boundaries. Shrubs that will bear a wealth of brilliant colored berries during the winter months. Climbing vines for the porches, pergolas and outbuildings. Choice new roses for the rose garden; in fact everything you need to make your homegrounds beautiful.

That this book may be plain to our customers not familiar with botanical names, we have used the botanical name followed by the common name where possible, and these names are cross indexed for your convenience. The nativity is given as nearly as known but in some instance this can only be given in a general way.

Where the height is given it has reference to the height the tree or plant finally attains under normal conditions.

We grade our ornamental trees and shrubs as follows: Upright growing trees and plants are graded by height, this particularly pertains to conifers, shade trees, and deciduous shrubs. Prostrate varieties such as some of the Junipers and Cotoneasters which do not make an upright growth are graded according to spread. In grading the evergreen shrubs both height and spread is taken into consideration.

Plants mentioned as “balled” means that they have been dug at the nursery with a ball of earth about the roots, and this ball has been wrapped with burlap. In planting a balled plant do NOT remove the burlap, cut top strings only. Plants mentioned as “Gallon Container” means they are established in gallon cans which should be cut down each side with either shears, or hatchet and removed without disturbing the roots of the plant when planting.

Deciduous Shrubs and Trees

**ACER. Maple**

*Acer dasycarpum*. “Silver (or Soft) Maple”. Eastern N. America. 60 feet. A large tree of rapid growth; foliage bright green above, silvery beneath. A favorite tree for streets and parks; grows well in the interior valleys. The foliage assumes beautiful autumnal tints in the fall. 6 to 8 ft. $1.25, $11.00 per ten.

**BETULA. Birch**

*Betula alba*. “White European Birch.” 40 feet. Tree medium to large with white bark on the older limbs and trunk; branches of a drooping habit; growth irregular but robust. Valuable either as a specimen or grouped in masses. Will thrive in any soil, even though of poor quality. Branched trees 8 to 10 ft. $2.50, Whips 6 to 8 ft. $1.50.

**CERCIS. Judas Tree**

*Cercis canadensis*. “Judas Tree”. Europe. 20 feet. A beautiful object in the spring when covered with a mass of rose-tinted colored flowers. Fine as a specimen plant or for grouping. Very ornamental. 4 to 6 ft. $1.00 each.

**CRATAEGUS. Thorn**

*Crataegus monogyna pauli*. “Paul’s Double Scarlet Thorn.” 12 feet. Tree rather small but erect in habit and a quick grower; flowers bright carmine and double; berries dull red and free fruiting. One of the most showy small deciduous trees. 4 to 6 ft. $1.25 each.

SHADE TREES COST LESS THAN A PARASOL AND SERVE FOR YEARS
GINKGO. Maidenhair Tree
Ginkgo biloba. "Maidenhair Tree." China and Japan. 60 feet. This strange species is said to be of lignum vitae purity. It does best in a deep moist soil and in a comparatively cool or warm damp climate. Not suited to hot dry atmospheres. Leaves wedge or fan shaped. Bare root 3 to 4 ft. $1.50 each.

POPULUS. Poplar
Populus balsamifera. "Balm of Gilead." N. America. 75 feet. A handsome, upright, spreading tree, rendering its fine for avenue planting, aligning drive ways, foliage a glossy green and abundant, giving a dense shade. These trees are very rapid growers and do not bear the objectionable cottony seed. Where quick shade is desired they have no equal.

ROBINIA. Locust
Robinia pseudacacia. "Black Locust." Eastern United States. 80 feet. Tree quite ornamental and used for street and avenue purposes; wood hard and durable, hence valuable for posts and railroad ties. Tree in bloom early spring and summer, a vigorous grower. Flowers borne in long pendulous racemes and fragrant. 6 to 8 ft. 75c each.

PLATANUS. Sycamore
Platanus. "Sycamore," 60 feet. Erect growing tree, with bright green foliage and beautiful mottled trunk. In great demand for shade and avenue planting; a rapid symmetrical grower, thriving in almost any soil. Regarded as one of the best trees for California and the Southwest. 8 to 10 feet. $1.50 each; 6 to 8 ft. $1.00 each.

Weeping Deciduous Trees
MORUS. Mulberry
Morus alba tatarica pendula. "Tea’s Weeping Mulberry." 8 ft. A very graceful weeping tree, with long slender branches, drooping to the ground, parallel to the stem; one of the most graceful and vigorous weeping trees. Very effective when used as a specimen on the lawn. Price $3.00 each.

SALIX. Willow
Salix babylonica aurea. "Golden Weeping Willow." 40 feet. Of identical habit with common weeping willow. Differs in the intense golden hue of the branches, making it particularly handsome during the winter. 6 to 8 ft. $1.25 each.

Flowing Fruit Trees
CYDONIA. Flowering Quince
Cydonia japonica. "Japanese Scarlet Quince." 10 feet. The Japanese quinces are beautiful dwarf species, remarkable for the brilliance of their blossoms, which vary from the richest scarlet to the most delicate blush color. They are well adapted for single plants, on the lawn, for the edges or borders of groups of trees and for planting ornamental beds. The foliage is very ornamental. The fruit has a delicious fragrance but is worthless.

RED FLOWERING. Deep Red. Balled plants 3 to 4 ft. $1.50.

PERSICIA. Flowering Peach
Double Red Flowered. 15 ft. Flowers semi-double, bright red. 4 to 6 ft. 60c each; 3 to 4 ft. 50c each.

Double Pink Flowering. 15 feet. Flowers Double Pink. Very beautiful and in demand by florists. 4 to 6 ft. 65c each; 3 to 4 ft. 50c each.

Double White. 15 feet. Flowers large, double and pure white. Branches covered with bloom in the spring. 4 to 6 ft. 65c each; 3 to 4 ft. 50c each.

PUNICA. Flowering Pomegranate
Punica Alba. "White Flowering Pomegranate." Asia. 6 to 10 feet. Flowers double and creamy white, followed by brilliant showy fruits. Foliage dark red and handsome with reddly tints on new growth. Gallon containers 2 to 3 ft. 75c each.

Punica Rubra. "Double Scarlet Flowering Pomegranate." S. Asia. 15 feet. Rapid growing shrub similar to Alba except flowers are deep double scarlet. Gallon containers 3 to 4 ft. 75c each.

Deciduous Shrubs
CAESALPINA. Puniciana
Caesalpinia gilliesii. "Bird of Paradise." 8 feet. Adapts itself to the poorest soils. Flowers yellow, pear-shaped, 2 inches long, with brilliant, protruding, red stamens, appearing all summer. Gallon containers 5 to 6 ft. $1.50 each.

PUNICA. Flowering Pomegranate
DEUTZIA
Deutzia. "Pride of Rochester." 8 feet. Tall growing variety. Flowers double, semi-double, with large, double, pink and white petals. An attractive shrub of free blooming habit which should be more widely planted in California. Gallon containers 3 to 4 ft. 75c each.

HIBISCUS. Rose of Sharon
Althea, or Rose of Sharon. "Hibiscus syriacus." Japan. 6 feet. Has deeply veined leaves and yellow flowers, followed by small black berries. Known also as Japanese rose, the flowers resemble small, double, yellow roses. Gallon containers 3 to 4 ft. 1.00 each.

HYDRANGEA
Hydrangea arborescens. 4 feet. A native of Japan, has large dark green leaves, and globular heads of rose-colored flowers. Their inconstant foliage and rich delicate flower globes render them very attractive. Gallon containers 75c each.

KERRIA JAPONICA
Kerria Japonica. Japan. 6 feet. Has deeply veined leaves and yellow flowers, followed by small black berries. Known also as Japanese rose, the flowers resemble small, double, yellow roses. Gallon containers 3 to 4 ft. 1.00 each.

LAGERSTROEMIA. Crape Myrtle
Lagerstroemia indica rosea. "Crape Myrtle." 12 feet. A free blooming shrub with rose, pink flowers, of curiously crimped petals, produced in very large panicles at the ends of the branches during the entire summer. Bare root plants 2 to 3 ft. 75c each.

LIPPIA CITRIDIORA. Lemon Verbena
Lippia Citriodora. "Lemon Verbena." South America. 6 feet. The old-fashioned favorite shrub, with long narrow pointed leaves, which emit a delightful lemon scented fragrance. Established in quart containers. 2 to 3 ft. 60c each.

PHILADELPHUS. Mock Orange
Philadelphus. "Mock Orange, Garden Syringa." Europe. Asia. 10 feet. Flowers pure white, delightful orange blossom fragrance; one of the first to bloom in the spring. Gallon containers 1½ to 2 ft. 75c each.

SPIRAEA. Spirea
Spiraea cantoniensis. "Double-Flowered Spiraea." 3 feet. Parest double white flowers along the entire length of the small twigs; foliage oval, deep glossy green, assuming a brilliant shade in autumn. Bare root plants 2 to 3 ft. 75c each.
FANCHER CREEK NURSERIES
SINCE......1884

Spiraea prunifolia flore pleno. “Double-Flowered Plum-leaved Spiraea.” Graceful, arching branches, round clusters of double, pure white flowers borne in profusion. A very showy shrub. Bare Root plants 2 to 3 ft. 75c each.

SYRINGA. Lilac

Double Purple Lilac. 8 feet. An old favorite, very fragrant. Of easy culture, hardy, and free blooming. 2 to 3 ft. $1.00 each.

Double White Lilac. 8 ft. Bears immense trusses of double, pure white flowers. 2 to 3 ft. $1.00 each.

TAMARIX. Tamarisk

Tamarix hispida aestivialis. Japan. 15 feet. Shrub four feet high with slender upright spreading branches; flowers pinkish appearing in early spring and again in summer in dense racemes forming terminal panicles; foliage bluish-green, handsome and feathery. Fine as a single specimen or in mass effects. Does fine in the interior valleys. Bare Root 4 to 6 ft. 75c each.

VIBURNUM. Snowball

Viburnum opulus sterilis. “Common Snowball.” N. America. 8 ft. Produces an abundance of pure white, globular flowers in May and June. Will thrive in most any kind of soil. Gallon containers 2 to 3 ft. $1.00 each.

WEIGELA.

Weigela rosea. “D. Florida.” China. 6 feet. An old favorite and probably still the most popular. Flowers pink, large and borne in the utmost profusion. Bare Root 2 to 3 ft. 75c each.

The Evergreen Trees

ACACIAS.

Valuable trees for park and garden, roadside and boulevard planting. All are rapid growers and thrive in nearly all sections of the state. Their free-flowering habits render them valuable acquisitions in the adornment of home surroundings. Although there are some 400 species of Acacia, we have confined ourselves to varieties of well-known merit, the uses of which are enumerated below.

ARAUCARIA BIDWILLII. “Bunya Bunya Tree.”

Acacia baileyana. 50 feet. An attractive shrub or tree either singly or in groups; foliage a gray-blue arranged spirally around the branchlets, leaves long and feathery; flowers in heads on peduncle, of an intense yellow which literally cover the whole plant in late winter and early spring. One of the best; should be widely planted. Gallon containers 4 to 5 ft. $1.50 each.

Acacia dealbata. Syn. A. Mollissima. “Silver Wattle.” 60 feet. Decidedly a favorite tree in California. Foliage varies from silvery to green and feathery in character; flowers fragrant, a clear-yellow, and borne in clusters covering the plant. Tree vigorous, fine shaped and very free flowering, a rapid grower when young. Gallon containers 4 to 6 ft. $1.00 each. 3 to 4 ft. 75c each.

Acacia Melanoxylon. “Black Acacia.” 75 feet. A good sized tree of pyramidal form; flowers a pale yellow borne in beads; foliage large and oblong. Tree a vigorous grower and free blooming; due to its symmetrical shape, renders it valuable for aligning walks and driveways, streets and avenues. Gallon containers 6 to 8 ft. $1.25 each; 5 to 6 ft. $1.00 each.

BRACHYCHITON. Bottle Tree

Brachychiton diversifolia. “Bottle Tree.” Australia. 40 feet. A magnificent avenue tree with graceful, tapering trunk. Foliage bright, glossy green, deeply lobed, the shape of which changes throughout the season. Tree of fine pyramidal shape and clean trunk. Also listed as Sterculia diversifolia. 4 to 5 ft. $1.00 each.

CAMPHORA. Camphor Tree

Camphora officinalis. China and Japan. 40 feet. A symmetrical ornamental tree, thriving in poor soil; foliage bright green. Well adapted for lawn and street planting. Gallon containers 2 to 3 ft. 75c each; 3 to 4 ft. $1.00 each.

CASUARINA. Beefwood

Casuarina stricta. Australia. 60 feet. The red color of the wood has given it the popular name of beefwood. The branches are long and slender and weeping with jointed needle-like leaves. An odd but beautiful ornamental tree, growing well even in alkaline soils; of very rapid growth. Stands pruning well and as formal street trees and for hedges we recommend them highly. Gallon containers 4 to 6 ft. $1.00 each; 3 to 4 ft. 75c each.

EUCALYPTUS. Gum Trees

Eucalyptus globulus. “Blue Gum.” 150 to 200 feet. Broad bluish leaves when young. More extensively planted than any other variety; wood when polished resembles hickory. Valuable for wagon work, bridges, tool-handles and for firewood. Gallon containers 4 to 6 ft. 75c each; $6.00 per ten; 4 inch pots 3 to 4 ft. 40c each, $3.00 per ten; flats of 100 plants $4.00 per flat.
The Coniferous Trees

This division embraces the most beautiful evergreen trees suitable for the Pacific Coast. Their evergreen habit and conical shapes render them especially desirable either as single specimens on the lawn, planted in small groups, or as background shrubs with other deciduous trees and shrubs.

**Araucaria**

* Araucaria Bidwillii. "Bunya-Bunya Tree." Australia. 150 feet. A magnificent tree; branches in regular whorls, closely set with sprays, deep green leaves; handsome for lawn, and by far the finest and most attractive of all evergreen trees. Does well in the interior valleys. 6 inch pots 12 to 15 inches $1.00 each; 5 inch pots 12 to 15 inches 75c each.

**Cedrus**

* Cedrus atlantica. "Mt. Altas Cedar." Africa. 120 feet. A handsome pyramidal tree; silvery green foliage; branches have an upright tendency. Balled 4 to 5 ft. $4.50 each.

* Cedrus deodara. "Himalayan or Indian Cedar." Himalaya Mountains. 100 to 150 feet. This magnificent tree from the Himalaya Mountains is a picture of grace and beauty. Pyramidal in general outline; the lower limbs lie on the ground, all the upper ones drooping gracefully. Foliage silvery green, and decidedly glaucous when the trees are young. The most rapid growing of all cedars and much in demand for avenue and lawn plantings. This tree is being widely planted in California for living Christmas Trees. Balled plants 2 to 3 ft. $2.00; 3 to 4 ft. $3.50 each; 4 to 5 ft. $5.00 each; 5 to 6 ft. $6.00 each.

**Cupressus**

* Cupressus sempervirens fastigiata. "Italian Cypress." Europe and Asia. 75 feet. A tall, very slender tapering tree with erect branches living close to the stem. The classical cypress of the Greek and Roman writers. Excellent for architectural effect. Should always be planted in dry situations. Balled 5 to 6 ft. $3.00 each; 6 to 7 ft. $4.00 each. Gallon containers 2 to 2½ ft. 75c each.

**Eucalyptus**

* Eucalyptus rostrata. "Red Gum." 120 feet. Outgrows any other variety in the interior valleys. Wood takes a handsome finish and is desirable for interiors. Called "Red Mahogany." Valuable for ties, fence posts, etc. Stands considerable frost. 4 inch pots 4 to 6 ft. 75c each; 5 to 4 ft. 60c each; flats of 100 plants $4.00 per flat.

* Eucalyptus rudis. "Desert Gum." 75 to 100 feet. An excellent avenue tree, of very rapid growth, and withstands both heat and cold. Wood hard and close grained. Gallon containers 4 to 5 ft. 75c each; flats of 100 plants $4.00 per flat.

**Magnolia**

* Magnolia grandiflora. "Bull Bay." Southern U. S. 60 feet. One of the grandest of broad-leaved evergreens; flowers pure waxy white, very fragrant and measure from 10 to 12 inches across. Very fine flowering, blooms appearing in May and June, succeeded by cone-like fruits, bearing seeds of deep coral-red in October. Foliage thick, brilliant green on the upper surface, and rusty underneath. Adapts itself to a wide range of locations. Gallon containers 2 to 3 ft. $1.00 each.

**Grevillea**

* Grevillea robusta. "Silk Oak." Australia. 150 feet. Very graceful fern-like leaves; of rapid growth; covered with bronze-yellow flowers in early summer. Resists drought; stately for avenue and lawn. Gallon containers 3 to 4 ft. $1.00 each; 2 to 3 ft. 75c each.

**Umbellularia**

* Umbellularia californica. "California Bay Tree." 25 feet. A very rapid growing tree with glossy lanceolate oblong leaves. Along the coast and near water courses it grows to perfection developing into a handsome tree. Gallon containers 2 to 3 ft. 75c each.
**JUNIPERUS. Juniper**

Juniper chinensis *pfitzeriana*. "Pfitzer's Juniper." 8 ft. A handsome and hearty variety of spreading habit forming a brood pyramidal head with horizontal drooping branches. Foliage a grayish green. Very ornamental. Balled plants 2 to 3½ ft. spread $2.50 each.

Juniper sabina. "Sabina Juniper." 6 to 8 feet. A low spreading shrub with trailing branches; foliage dense and dark green in color. Plant does well in poor soil. Balled plants 3 to 4 ft. spread $3.00 each; 2 to 2½ ft. $2.50 each.

**LIBOCEDRUS.**

Libocedrus decurrens. *"Incense Cedar."* California. 100 ft. An ornamental, distinct, erect, compact, growing tree, with a stout trunk; foliage bright, rich glossy green. A native of the mountain regions of California and Oregon. Does exceedingly well on the coast and in the interior. Valuable for parks or lawns, either when planted singly or in masses. 3 inch pots 25c each; gallon containers 1½ to 2 ft. 75c each; 2½ gallon containers $1.50 each.

**PINUS. Pine**

Pinus halicarnensis. "Allelo Pine." Western Asia. 60 ft. A fast growing variety desirable for hillside planting where immediate effect is desired. Foliage dense and of bluish green color. Balled 4 to 5 ft. $2.50 each; 3 to 4 ft. $2.00 each.

Pinus radiata. "Monterey Pine." California. 100 feet. Leaves slender and dark green, very bushy. One of the fastest growing pines, well adapted to the coast regions. Balled 3 to 4 ft. $3.00 each.

**SEQUOIA. California Big Tree**

Sequoia gigantea. "California Big Tree." California. 350 feet. The pride of the state and the monarch of the timber forests of the world. A magnificentpark, avenue or specimen tree, of pyramidal form; lower branches drooping; foliage dense and bluish green. Reaches a diameter of 40 ft. Balled plants 2 to 3 ft. $5.00 each; gallon containers 10 to 16 inches $2.00 each.

Sequoia sempervirens. "California Redwood." California. 300 feet. A valuable ornamental tree of rapid growth and of a tapering pyramidal habit. Does well in all parts of the state. Tree free branching; needles dark green with two pale bands beneath; a good grower. The timber of this tree is world famous. Established in containers 4 to 5 ft. $5.00 each; 3 to 4 ft. $2.50 each; 2 to 3 ft. $1.50 each.

**TAXODIUM. Bald Cypress**

**SEQUOIA GIGANTEA**

"The Nation's Christmas Tree"

**THUJA. Arborvitae**

Thuja orientalis aurea nana. "Berkman's Dwarf Ever-golden Arborvitae." 10 feet. Shrub or small tree with spreading and ascending branches; foliage a bright, pleasing shade of green, turning to a bronzy hue in winter. Valuable in formal garden effects and indoor decoration. Balled 1½ to 2 ft. $1.75 each; 1 to 1½ ft. $1.50 each; 8 to 12 inches $1.25 ea.

Thuja orientalis pyramidalis. "Oriental Pyramidal Arborvitae." 15 feet. Of upright growth and columnar habit; foliage light green; desirable for formal effects. Balled plants 2 to 3 ft. $3.50 each.

**The Evergreen Shrubs**

**SHRUBBERY MAKES "THE HOME BEAUTIFUL"**

**ABELIA.**

Abelia grandiflora. 6 feet. A pretty shrub of straggling growth, bearing small, fragrant, tuba-like flowers during the entire summer, color: light rose on the outside and white on the inside. Foliage turns coppery in the fall. Balled plants 2 to 3 ft. $1.50 each. Gallon containers 75c each.

**ACUBA. Gold Dust Plant**

Acuba japonica "nigra mucoides. "Japanese Laurel." S. Asia to Japan. 4 ft. Foliage rather large, dark-green and shining, yellow spotted; flowers small in terminal panicles; berries varying scarlet. A hardy shrub which should be grown in partial shade. Established in gallon containers 75c each.

**ARBUTUS. Strawberry Tree**

Arbutus urseda. "Strawberry Tree." Europe. 10 feet. Foliage dark green, peculiarly beautiful in the fall, when the tree is covered with blossoms and ripe edible fruits which are almost identical with the strawberry in size, form and color. A hardy shrub which should be more widely planted. Gallon containers 75c each.

**BUDDLEIA.**

Buddleia magnifica. China. 10 feet. A beautiful arching shrub of robust habit; foliage a bright green, long and narrow; flowers of a deep rose-purple, with an orange eye and the margin of the petals suffused; panicles dense; blooms in August. Gallon containers 2 to 3 ft. 75c each.

Buddleia variabilia. "Butterfly Bush." (Davidii) China. 3 to 8 feet. Fast growing shrub remains half evergreen, except in very cold climates; flowers borne in long purple spikes appearing from June to November. Should be pruned severely in winter; cut back flower stems as soon as they fade. Gallon containers 2 to 3 ft. 75c each.

**BUXUS. Boxwood**

Buxus sempervirens. "Common Box." England. 5 feet. Of dense growing habit; foliage dark green above and pale beneath; flowers pale green with yellow anthers. Plants vigorous and hardy. Useful in formal garden effects as specimen plants, borders, etc. Can be trained in any shape desired. Balled cone shaped plants 16 to 20 inches $1.50 each; 20 to 24 inches $2.25 each; 24 to 26 inches $2.75 each.

**CALLISTEMON. Bottle-Brush**

Callistemon lanceolatus. "Lemon Bottle-Brush." (Metrosideros semperflorens). Australia, New South Wales. 5 to 12 feet. A native of the Pacific Islands and thriving perfectly in California, this showy, flowery shrub should be given consideration when making up your planting list. Leaves long and narrow, branches drooping. Flowers red, and the exact shape of a bottle brush. Very hardy and is not particular as to soil. Potted 1½ to 2 ft. 75c each.
CAMELLIA.

Camellia japonica. China, Japan. 6 to 10 feet. Common and well-known Camellia. Grows very slowly but begins blooming when very young. Foliage ovate, dark green, thick and glossy; flowers large, double and of various shades of color. Prefers a shady situation. Double Red and Double White. Potted in 5 inch pots $1.50 each.

CEANOTHUS.

Ceanothus thyrsiflorus. "California Lilac." 10 to 12 feet. A splendid variety with fine dark green foliage; flowers light blue. A free flowering shrub especially valuable for its late flowering habit. Prefers a sunny position and will thrive in any soil. Gallon containers 75c each.

CHOISYA.

Choisya ternata. "Mexican Orange." 6 feet. A beautiful shrub with bright green clean cut foliage; flowers white, fragrant and borne in clusters. Thrives in moist any situation. Balled 2 to 3 ft. $1.25 each.

CHORIZEMA.

Chorizema ilicifolia. Australia. 3 feet. An interesting shrub of low dense habit of growth and drooping branches; flowers orange red in loose racemes; foliage brilliant green. May be planted singly or in groups. Gallon containers 75c each.

CISTUS. Rock Rose

CORNUS. Dogwood

Cornus caputmedusae. "Evergreen Dogwood." Himalayas. 15 feet. A large sized shrub with flowers similar to those of the eastern flowering dogwood. The plant does well in California. Flowers cream colored becoming rosy red before falling, followed by black showy fruits, edible but insipid. A beautiful shrub deserving to be widely planted. Gallon containers 2 to 4 ft. 75c each.

COTONEASTER.

Cotoneaster franchetti. China. 6 feet. Spreading grower, leaves oval and narrow. Berries orange yellow, persisting all winter. Unsuitable for grouping and edging. Balled plants 2 to 3 ft. $2.00 each. Gallon containers 75c each.

Cotoneaster horizontalis. China. 2 feet. Branches stout, almost horizontal; large, rose-colored flowers; leaves small, berries bright red in fall. One of the best trailing shrubs. May be used for edging. Large plantings, shrubbery, borders, etc. Gallon containers 1 to 1 1/2 ft. spread 75c each. Balled 2 to 3 ft. spread $1.75 each.

Cotoneaster microphylla. "Rock-spray Cotoneaster." Himalayas. 2 feet. Low growing and dense, foliage dark green and round, berries purple-red, borne along the stem; flowers white. Balled plants 2 to 3 ft. spread 1.75c each.

Cotoneaster pannosa. "Silver-leaf Cotoneaster." China. 8 feet. Shrub of upright growth, branches long and slender, leaves deep green above, silvery beneath. Flowers white; scattered, borne on slender stems by generous quantities of red berries in the fall. The branches loaded with berries can be cut and kept in water for weeks. Balled plants 4 to 5 ft. $2.50 each; 2 to 3 ft. $1.50 each; gallon containers 2 to 2 1/2 ft. 75c each.

DIOSMA. Breath of Heaven

Diosma ericoides. "Breath of Heaven." Africa. 5 feet. Foliage featherlike; agreeably fragrant; flowers white, small, star-shaped; used in floral work. Plant hardy; very easily grown. 4 inch pots 12 to 14 inches 60c each.

ELAEAGNUS. Evergreen Oleaster

Elaeagnus pungens argenteus. "Bronze Oleaster." Japan. 10 feet. Spreading shrub, broad brown branches; leaves glossy green and silvery. Thrives remarkably well in the interior valleys and foothills. Balled plants 2 to 3 ft. $1.50 each. Gallon containers 2 to 3 ft. 75c each.

ESCALLONIA.

Escallonia rosea. South America. 8 feet. Growth strong and upright, the flowers are a pronounced pink, in conspicuous terminal racemes. Leaves rough serrate and with resinous glands beneath. Very hardy. Balled 2 to 3 ft. spread $1.50 each. Gallon containers 1 1/2 to 2 ft. 75c each.

Escallonia rubra. South America. 6 feet. Branches erect, hairy; dwarf; shining green leaves. Flowers rather dark red, in short terminal clusters. A compact shrub of rather slow dense growth. Gallon containers 1 to 1 1/2 ft. 75c each.

EUONYMUS.

Euonymus japonica albo-marginata. "Silver Margined Euonymus." 4 feet. Of upright growth; foliage narrow margined with silvery white. Balled 2 to 3 ft. $1.50 each.

Euonymus japonica albo-variegata. "Silver Variegated Euonymus." 4 feet. Foliage almost white around the edges, changing to yellow with the season. Beautiful for hedges and fine in landscape gardening. Balled plants 2 to 3 ft. $1.50 each.

Euonymus japonica. "Evergreen Euonymus." Japan. 6 feet. An upright densely leafy evergreen shrub; flowers greenish white borne on cyenes; foliage lustrous dark green. Fine for grouping or massed effects. Balled plants 2 to 3 ft. $1.50 each. Gallon containers 12 to 18 inches 75c each; 2 1/2 inch pots for hedge purposes 5c each.

Euonymus japonica aurea. "Golden-leaved Euonymus." 5 feet. In character like the preceding, but highly prized for its rich golden foliage. Gallon containers 12 to 18 inches $1.00 each.

Euonymus japonica microphylla. (E. Pulchellus) "Small-leaved Euonymus." 2 feet. Distinct and individual in character, dwarf and of compact habit of growth. Leaves dark green, slender and small. Effective for edging and borders. Hardy and of easy culture. Balled plants 5 to 12 inches 75c each.

Euonymus japonica President Gauthier. 6 feet. Of spreading habit; foliage silvery variegated pink. Balled plants 2 to 3 ft. 1.75 each. Gallon containers 2 to 3 ft. 75c each.

FABIANA IMBRICATA.

Fabiana imbricata. South America. 3 feet. A very erect growing shrub with heath-like foliage and white funnel-shaped flowers. Established in 4 inch pots 1 1/2 to 2 ft. 75c each.

GENISTA. Broom

Genista canariensis. "Canary Island Broom." Canary Islands. 6 to 8 feet. Makes a dense growth; branches downy; flowers borne in dense racemes, bright yellow in color and fragrant. Valuable as a contrast in solid green shrubbery. Established in quart containers 3 to 4 ft. 75c each.

PALMS ADD TO THE TROPICAL APPEARANCE OF THE LANDSCAPE

ARMUTUS UNEDO—"STRAWBERRY TREE"
Genista hispanica. "Spanish Broom," Europe. 8 feet. An upright growing shrub; flowers yellow, on long drooping, leafless branches. A hardy, drought resistant plant. Very effective as a specimen plant. Established in quart containers 2 to 3 ft. 75c each.

Genista racemosa. "Sweet Broom," Canary Islands. 6 feet. The best of all, medium in size; flowers yellow and fragrant. Slender branches with small green leaves lending the plant a feathery appearance. A solid mass of pea shaped blooms cover the plant in the spring. Will stand plenty of heat and requires a sunny location. Established in 5 inch pots 75c each.

**HYPERICUM. Gold Flower**

**LEPTOSPERNUM. Australian Tea Tree**

Leptospermum laevidatum. "Australian Tea Tree." Australia 15 feet. A tall gracefully arching shrub; foliage grayish green; flowers white borne in the greatest profusion. A fine shrub for rapid effects; not particular as to soil and situation. Established in gallon containers 2 to 3 ft. 75c each.

**LIGUSTRUM. Evergreen Privet**

Ligustrum japonicum. "Japanese Privet." Japan. 6 to 12 feet. Glossy dark leathery leaves. White flowers in clusters; purplish berries. Standard specimens trimmed globes, balled 4 to 6 ft. $3.00 to $5.00 each depending on size of head. Gallon containers 1 1/2 to 2 ft. 75c each.

Ligustrum ovalifolium. "California Privet." Japan. 4 to 8 feet. A pyramidal shrub with bright green narrow leaves; producing white flowers in June. Good hedge plant, partially deciduous. Barked 2 to 3 ft. $1.00 per hundred.

Ligustrum ovalifolium aurea marginata. "California Golden Privet." Japan. 10 to 20 feet. Same as preceding only that the foliage is beautifully margined with yellow variations. Gallon containers 1 1/2 to 2 ft. 75c each.

**MAHONIA. Barberry, Grape**

Mahonia aquifolium (Berberis aquifolium) "Oregon Grape." Pacific Coast. 6 feet. Shining purplish, prickly leaves; bright yellow flowers; berries blue-black, borne like grapes, hence the common name. A native widely used where autumn leaf color effects are a consideration, and also for thicket effects. Balled plants 2 to 3 ft. $1.50 each; gallon containers 75c each.

**MELALEUCA.**

**NANDINA DOMESTICA**

Myrtus communis. "Common Myrtle." Europe. 8 feet. Classic shrub, with handsome, aromatic foliage, and fragrant white flowers, which appear in summer, followed by berry shaped fruits of blue-black color, Fine for grouping, as single specimens, hedges, pot or tub plants. Balled plants 2 to 3 ft. $1.50 each; gallon containers 1 to 1 1/2 ft. 75c each; 2 1/2 inch pots for hedge purposes 15c each.

Myrtus communis microphylla. "Small Leaved Myrtle." 6 feet. Habit of growth somewhat spreading and compact; foliage quite small; shrub distinct and effective; robust and free flowering. Valued hedge plant. Balled plants 1 1/2 to 2 ft. $1.75 each. Gallon containers 1 to 2 ft. 75c each; 2 1/2 inch pots for hedge purposes 15c each.

Myrtus communis variegata. "Variegated Roman Myrtle," 6 feet. Habit of growth similar to microphylla. Foliage marked and striped green and white. Fine for small hedges. Balled plants 1 1/2 to 2 ft. $1.50 each. Gallon containers 75c each.

**NANDINA.**

Nandina domestica. "Japanese Nandina." China and Japan. 4 to 6 ft. A beautiful upright growing shrub with a number of reed-like stems about as thick as a finger and crowned with deep, glossy green leaves and tall spikes of white flowers. The young growth is tinged with red which in winter assumes beautiful coppery tones. In the fall the plant is covered with masses of small red and white berries borne in clusters; does well on the coast and in the interior valleys. Balled plants 2 to 3 ft. $1.50 each; 3 to 4 ft. $2.00 each; gallon containers 12 to 16 inches 75c each.

**NERIUM. Oleander**

Oleanders are particularly adapted to this climate and deserving of wider planting; their large deep green foliage combined with fragrant flowers of many hues, which appear all summer, renders them attractive and effective. We specialize in the production of these beautiful shrubs, hence heartily recommend any of the following as among the best.

Gallon containers 2 to 3 ft. $1.50 each; 2 to 3 1/2 ft. $1.00 each; 3 1/2 to 4 ft. $1.00 each.

Madam Sarah Bernhardt. Immense truss; single, delicate white streaked pink.

Mrs. F. Roeding. Originated by us; strong fringed, color of La France rose.

Sister Agnes. Very large truss; single; pearly white; very free blooming. Splendens Giganteum. Double Rose; very fragrant; largest of all Oleanders; blooms all summer.

Dr. Golfin. Bears immense trusses of single, soft rose flowers two inches across, corolla streaked white. Plant a good grower.

Prof. Durand. A free bloomer. Flowers semi-double with two corollas, color changing from creamy white to a deep amber yellow, throat permanent amber.

**PHOTINIA.**

Photinia Arbutifolia. "Heteromeles) "Christmas Berry." California. 10 feet. A native shrub of California, growing quite abundantly in the coast counties and thriving equally well in the hot, dry climate of the interior. In bloom in the winter; in numerous white panicles. Valued highly not only as a striking decorative plant, but also for the deep red berries which hang in immense clusters on the ends of the branches from November to February. These are extensively used during the holidays.

**PHOTINIA ARBUTIFOLIA "CHRISTMAS BERRY"**

Bears immense crops of bright red berries.
ROSMARINUS. Rosemary

TEUCRIUM. Teucrium fruticans. Southern Europe. 3 feet. A small almost everblooming shrub suitable for dry locations. Leaves ovate and of grayish color. Flowers blue. Gallon containers 1 to 1½ ft. 75c each.

VERONICA. Veronica decusata. New Zealand. 3 to 5 feet. Hardy and of dense growth; foliage oval, bright green and compact. Flowers deep blue. Seems to do well in the hot interior valleys when given a northern exposure or partial shade. Fine for banking. Balled plants 2 to 3 ft. $1.50; gallon containers 1 to 1½ ft. 75c each.

VERONICA. Veronica decusata variegata. 3 to 5 feet. Of recent introduction. Foliage brilliant yellow variegated; flowers light blue. Balled plants 2 to 3 ft. $1.50 each. Gallon containers 12 to 16 inches 75c each.

VIBURNUM. Viburnum tinus. "Laurustinus." Mediterranean region. 10 feet. A well known and popular shrub planted widely in California as a specimen plant and effective for hedges. Bears an abundance of white flowers in the winter. Very hardy. Balled 2 to 3 ft. $1.75 each; gallon containers 12 to 16 inches 75c each.

VIBURNUM. Viburnum tinus lucidum. "Grafillora." Mediterranean Region. 8 to 12 feet. A strong grower; foliage large and glossy; flower clusters of immense size. Balled 2 to 3 ft. $1.75 each; gallon containers 12 to 16 inches 75c each.

The Climbers and Trailers
This list comprises the best deciduous and evergreen climbing and trailing vines. No home is complete without a few climbing vines to shade the porches and pergolas. In the interior climbers should be used extensively in any situation where shade is desired.

AMPELOPSIS. Ampelopsis quinquifolia. "Virginia Creeper." Eastern U. S. Common American Ivy; luxuriant foliage, assuming gorgeous colors in autumn. For covering brick and stone walls, chimneys, and houses it is one of the best. Potted 50c each, $4.00 per ten.

AMPELOPSIS. Ampelopsis veitchii. "Boston Ivy." Japan. Leaves glossy green, glorious autumnal coloring; flowers small, dense clusters of deep blue berries. Climbing by tendrils it is useful for covering walls, chimneys, etc. Potted 50c each, $4.00 per ten.

PRUNUS. Evergreen Cherry
Prunus caroliniana. "Carolina Cherry-Laurel." So. Eastern U. S. 20 to 40 feet. A handsome evergreen, with shining, thick dark green, oval, raw-toothed leaves. Does best along the coast or near streams. Gallon containers 2 to 3 ft. 75c each.

PITTOSPORUM. Pittosporum tobira. Japanese Pittosporum. Japan. 5 to 8 feet. A shrub that commends itself to garden lovers for the beauty of its foliage and symmetrical habit of growth. Whitish flowers in racemes, followed by masses of large bright red berries. Makes a large spreading bush and should be given plenty of room. Established in containers 1 to 1½ ft. 75c each; 2 to 2½ ft. $1.25 each; 2½ to 3 ft. $1.50 each.

Pittosporum tobira variegatum. "Variegated Japanese Pittosporum." Japan. 10 to 12 feet. A variegated form of the preceding; foliage margined white. Balled 2 to 3 ft. $1.75 each. Gallon containers 8 to 16 inches 75c each.

PRUNUS. Evergreen Cherry
Prunus caroliniana. "Carolina Cherry-Laurel." So. Eastern U. S. 20 to 40 feet. A handsome evergreen, with shining, thick dark green, oval, raw-toothed leaves. Does best along the coast or near streams. Gallon containers 2 to 3 ft. 75c each.

PITTOSPORUM. Pittosporum tobira. Japanese Pittosporum. Japan. 5 to 8 feet. A shrub that commends itself to garden lovers for the beauty of its foliage and symmetrical habit of growth. Whitish flowers in racemes, followed by masses of large bright red berries. Makes a large spreading bush and should be given plenty of room. Established in containers 1 to 1½ ft. 75c each; 2 to 2½ ft. $1.25 each; 2½ to 3 ft. $1.50 each.

Pittosporum tobira variegatum. "Variegated Japanese Pittosporum." Japan. 10 to 12 feet. A variegated form of the preceding; foliage margined white. Balled 2 to 3 ft. $1.75 each. Gallon containers 8 to 16 inches 75c each.

PRUNUS. Evergreen Cherry
Prunus caroliniana. "Carolina Cherry-Laurel." So. Eastern U. S. 20 to 40 feet. A handsome evergreen, with shining, thick dark green, oval, raw-toothed leaves. Does best along the coast or near streams. Gallon containers 2 to 3 ft. 75c each.

PITTOSPORUM. Pittosporum tobira. Japanese Pittosporum. Japan. 5 to 8 feet. A shrub that commends itself to garden lovers for the beauty of its foliage and symmetrical habit of growth. Whitish flowers in racemes, followed by masses of large bright red berries. Makes a large spreading bush and should be given plenty of room. Established in containers 1 to 1½ ft. 75c each; 2 to 2½ ft. $1.25 each; 2½ to 3 ft. $1.50 each.

Pittosporum tobira variegatum. "Variegated Japanese Pittosporum." Japan. 10 to 12 feet. A variegated form of the preceding; foliage margined white. Balled 2 to 3 ft. $1.75 each. Gallon containers 8 to 16 inches 75c each.

PRUNUS. Evergreen Cherry
Prunus caroliniana. "Carolina Cherry-Laurel." So. Eastern U. S. 20 to 40 feet. A handsome evergreen, with shining, thick dark green, oval, raw-toothed leaves. Does best along the coast or near streams. Gallon containers 2 to 3 ft. 75c each.

PITTOSPORUM. Pittosporum tobira. Japanese Pittosporum. Japan. 5 to 8 feet. A shrub that commends itself to garden lovers for the beauty of its foliage and symmetrical habit of growth. Whitish flowers in racemes, followed by masses of large bright red berries. Makes a large spreading bush and should be given plenty of room. Established in containers 1 to 1½ ft. 75c each; 2 to 2½ ft. $1.25 each; 2½ to 3 ft. $1.50 each.

Pittosporum tobira variegatum. "Variegated Japanese Pittosporum." Japan. 10 to 12 feet. A variegated form of the preceding; foliage margined white. Balled 2 to 3 ft. $1.75 each. Gallon containers 8 to 16 inches 75c each.

PRUNUS. Evergreen Cherry
Prunus caroliniana. "Carolina Cherry-Laurel." So. Eastern U. S. 20 to 40 feet. A handsome evergreen, with shining, thick dark green, oval, raw-toothed leaves. Does best along the coast or near streams. Gallon containers 2 to 3 ft. 75c each.

PITTOSPORUM. Pittosporum tobira. Japanese Pittosporum. Japan. 5 to 8 feet. A shrub that commends itself to garden lovers for the beauty of its foliage and symmetrical habit of growth. PHOENIX CANARIENSIS PALM

BIGNONIA. Trumpet Flower

Bigmonia grandiflora. "Trumpet Vine." Japan. A strong climber; large orange scarlet flowers; deciduous foliage. Potted 50c each, $4.00 per ten.

Bignonia tweediana. S. America. A rampant grower, clinging; small evergreen leaves; flowers canary yellow, trumpet shaped. Will cling to any surface; a fine wall cover. Potted 50c each, $4.00 per ten.

BOUGAINVILLEA.

Bougainvillea spectabilis. Leaves large, bright green; flowers rosy magenta. 5 inch pots $1.25.

FICUS. Fig

Ficus Repens. "Climbing Fig." Japan. A hardy evergreen climber; leaves fan-shaped; small, bright green; flowers yellow in open clusters. Potted 50c each, $4.00 per ten.

HEDERA. Ivy

Hedera helix. "English Ivy." Popular everywhere; foliage dark green and leathery; flowers of a greenish color followed by clusters of black berries. Vine very vigorous and is used for covering walls, trunks of trees, screens, houses, or can be used as a ground covering. Will thrive with little or no care in any situation. Potted 50c each, $4.00 per ten.

Hedera variegata. "Variegated Ivy." A form of the preceding with bright green leaves, margined and blotched with shades of creamy white. Potted 50c each, $4.00 per ten.

JASMINUM. Jasmine

Jasminum nudiflorum. "Naked Flowered Jasmine." China. Drooping branches endowed with bright yellow flowers in winter before leaves appear. Vine hardy and especially handsome during the blooming period. Potted 50c each, $4.00 per ten.

Jasminum primulinum. China. A new variety. Valuable because a fast grower. Foliage consists of three good sized leaflets; flowers a clear primrose yellow, large and usually double. Potted 50c each, $4.00 per ten.

LONICERA. Honeysuckle

Lonicera halliana japonica. "Japanese Honeysuckle." Rampant evergreen climber; dark green, ovaete leaves; flowers fragrant, white, changing yellow. A great favorite in the interior valleys and coastal regions for covering pergolas, porches trellis-work, fences, etc. Potted 50c each, $4.00 per ten.

MUEHLENBECKIA. Wire Vine

Muehlenbeckia complexa. "Maiden Hair Vine." New Zealand. Very rapid and showy climber; flowers small, thick, waxy white, followed by transparent glistening, icle-like fruits. Potted plants 50c each.

PLUMBAGO. Leadwort

Plumbago capensis. S. Africa. Of upright straggling climbing habit; foliage long and tapering; flowers in short spikes and a beautiful azure blue in color. Vine hardy and free growing. Gallon containers 75c each; $6.50 per ten.

THE PALMS

CHAMAEROPS.
Chamaerops humilis. "Dwarf Fan Palm." Mediterranean region 8 ft. Somewhat of a slow grower but hardy. Leaves fan-shaped but small. Useful for small lawns, planted in groups or as a tub plant. Balled 11/2 to 2 ft. $3.00 each; gallon containers 75c each.

Chamaerops excelsa. (Trachycarpus) "Windmill Palm." Asia. 20 ft. Trunk slim and very hairy; in old specimens thicker at the top than at the base. Leaf segments are narrow and flexible; the outer third usually droops on older leaves. An excellent species for street plantings. Hardest palm known. 10 inch pots $1.25 each; gallon containers 75c each.

COCOS.
Cocos nucifera. "Pindo Palm." Paraguay. 10 to 15 ft. Slow-growing, but a graceful and handsome palm; leaves silvery green, strongly arched and recurved. Fine for small lawns, because less vigorous and massive than the date palm. Hardy, vigorous and worthy of wider cultivation. Boxed 3 to 4 ft. $4.00 each; 2 to 3 ft. $2.50 each; gallon containers 12 to 15 inches 75c each.

PHOENIX.

Phoenix canariensis. "Canary Island Palm." Canary Isles. 60 ft. The hardiest of hardy palms; leaves point, deep dark green; on long pendulous fronds. Few palms have done more to add to the semi-tropical appearance of our landscape than this massive, majestic palm. Ideal for street, avenue, park and lawn. Tub 6 to 7 ft. $5.00 each; 4 to 6 ft. $4.00 each; balled 4 to 6 ft. $3.50 each; gallon containers 75c each.

DECORATIVE BEDDING AND BORDER PLANTS

PHORMIUM. Flax

Phormium tenax. "New Zealand Flax." Large erect, dark green leaves, with narrow, reddish brown margins. Gallon containers 15 ft. $1.00.

HARDY FERNS.

Asparagus sprengeri. Useful for decorative purposes; white flowers; red berries; friends rich green, valuable for cutting, remaining fresh for weeks; fine for hanging baskets, and an excellent house plant. 4 inch pots 50c each.

Asparagus plumosus. Beautiful climbing plant; bright green, striped feathery foliage. Fine for cut flower sprays. 4 inch pots 50c each.

Woodwardia radicans. The most hardy California fern. It is commonly called "California Mountain Fern" as its natural habitat is the mountain and mountain valleys of California. Friends long and bright green in color. Makes a beautiful bedding plant. Potted bushy plants 75c each.

DRACAENA.

Dracaena indica. New Zealand. 30 ft. Fine for avenue and street trees for the coast; does not do well in the interior. Balled 5 to 6 ft. $5.00 each; gallon containers 75c each.

BAMBOO.

Bambusa aurea. China and Japan. 10 to 15 ft. Easily recognized by the very short nodes at the base of the culms. Branches or stalks yellowish, often brilliant in color, the internodes at the base remarkably short; leaves narrowed from near the base to apex. 2 to 4 inches long, light green and glaucous beneath. Sheaths deciduous, marked purple. Clumps 4 to 6 ft. $1.50 each.

PAMPAS GRASS.

Cortaderia argenteum. "Pampas Grass." Argentine. 6 to 8 ft. Leaves long and narrow, drooping; gorgeous silvery plumes. Clumps $1.50 each.

Cortaderia rosi des rosae. Argentine. 6 to 8 ft. A winter bloomer leaves narrow, plumes rosy purple. Clumps $1.50 each.

HOW TO GET TO THE FANCHER CREEK NURSERIES

The Fancher Creek Nurseries main office, display grounds, and retail plant yards are located at the junction of the Golden State Highway at Belmont and Thorne Avenues in the City of Fresno and just opposite Beautiful Roeding Park. Visitors coming from the North on the State Highway will note by the map that they are obliged to pass the nursery in getting into the business section of the city. Visitors coming from points south of Fresno will note that three main boulevards lead directly into Belmont Ave. from the Golden State Highway on the South. The shortest and most convenient route from the South is via Broadway or H Street as indicated by the map.

VISITORS ARE ALWAYS WELCOME

A trip thru our gigantic plant store will prove most interesting. Here you will find the largest assortment of Fruit trees, Grape vines, Shade Trees, Ornamental shrubbery, Climbing vines and Roses. We have many items in stock which are not listed in this catalog owing to insufficient quantities. Plan a trip to our nursery. You'll enjoy every minute of your visit and perhaps our salesmen can offer suggestions which will help you with your planting problems.
